Masterminds of Programming Federico Biancuzzi,Chromatic,2009-03-21 Masterminds of Programming features exclusive interviews with the creators of several historic and highly influential programming languages In this unique collection you ll learn about the processes that led to specific design decisions including the goals they had in mind the trade offs they had to make and how their experiences have left an impact on programming today Masterminds of Programming includes individual interviews with Adin D Falkoff APL Thomas E Kurtz BASIC Charles H Moore FORTH Robin Milner ML Donald D Chamberlin SQL Alfred Aho Peter Weinberger and Brian Kernighan AWK Charles Geschke and John Warnock PostScript Bjarne Stroustrup C Bertrand Meyer Eiffel Brad Cox and Tom Love Objective C Larry Wall Perl Simon Peyton Jones Paul Hudak Philip Wadler and John Hughes Haskell Guido van Rossum Python Luiz Henrique de Figueiredo and Roberto Ierusalimsky Lua James Gosling Java Grady Booch Ivar Jacobson and James Rumbaugh UML Anders Hejlsberg Delphi inventor and lead developer of C If you re interested in the people whose vision and hard work helped shape the computer industry you ll find Masterminds of Programming fascinating *The Practice of Reproducible Research* Justin Kitzes,Daniel Turek,Fatma Deniz,2018 The Practice of Reproducible Research presents concrete examples of how researchers in the data intensive sciences are working to improve the reproducibility of their research projects In each of the thirty one case studies in this volume the author or team describes the workflow that they used to complete a real world research project Authors highlight how they utilized particular tools ideas and practices to support reproducibility

emphasizing the very practical how rather than the why or what of conducting reproducible research Part 1 provides an accessible introduction to reproducible research a basic reproducible research project template and a synthesis of lessons learned from across the thirty one case studies Parts 2 and 3 focus on the case studies themselves The Practice of Reproducible Research is an invaluable resource for students and researchers who wish to better understand the practice of data intensive sciences and learn how to make their own research more reproducible **The Practice of Crowdsourcing**

Omar Alonso,2022-06-01 Many data intensive applications that use machine learning or artificial intelligence techniques depend on humans providing the initial dataset enabling algorithms to process the rest or for other humans to evaluate the performance of such algorithms Not only can labeled data for training and evaluation be collected faster cheaper and easier than ever before but we now see the emergence of hybrid human machine software that combines computations performed by humans and machines in conjunction There are however real world practical issues with the adoption of human computation and crowdsourcing Building systems and data processing pipelines that require crowd computing remains difficult In this book we present practical considerations for designing and implementing tasks that require the use of humans and machines in combination with the goal of producing high quality labels **Proceedings of the 2022 5th**

invisible architecture of thought that drives the digital age *Computer Information Systems and Industrial Management* Khalid Saeed, Jiří Dvorský, Nobuyuki Nishiuchi, Makoto Fukumoto, 2023-09-14 This book constitutes the proceedings of the 22nd International Conference on Computer Information Systems and Industrial Management CISIM 2023 held in Tokio Japan during September 22-24, 2023. The 36 papers presented in this book were carefully reviewed and selected from 77 submissions. They were organized in topical sections as follows: biometrics and pattern recognition applications; computer information systems and security; industrial management and other applications; machine learning and artificial neural networks; modelling and optimization; wellbeing and affective engineering; and machine learning using biometric data and kansei data. The Practice of Cloud System Administration Thomas A. Limoncelli, Strata R. Chalup, Christina J.

Hogan, 2014-09-01 There is an incredible amount of depth and thinking in the practices described here and it is impressive to see it all in one place. Win Treese, coauthor of *Designing Systems for Internet Commerce*. *The Practice of Cloud System Administration* Volume 2 focuses on distributed or cloud computing and brings a DevOps/SRE sensibility to the practice of system administration. Unsatisfied with books that cover either design or operations in isolation, the authors created this authoritative reference centered on a comprehensive approach. Case studies and examples from Google, Etsy, Twitter, Facebook, Netflix, Amazon, and other industry giants are explained in practical ways that are useful to all enterprises. The new companion to the best-selling first volume, *The Practice of System and Network Administration*, Second Edition, this guide offers expert coverage of the following and many other crucial topics: Designing and building modern web and distributed systems; Fundamentals of large system design; Understand the new software engineering implications of cloud administration; Make systems that are resilient to failure and grow and scale dynamically; Implement DevOps principles and cultural changes; IaaS, PaaS, SaaS, and virtual platform selection; Operating and running systems using the latest DevOps/SRE strategies; Upgrade production systems with zero down time; What and how to automate; how to decide what not to automate; On-call best practices that improve uptime; Why distributed systems require fundamentally different system administration techniques; Identify and resolve resiliency problems before they surprise you; Assessing and evaluating your team's operational effectiveness; Manage the scientific process of continuous improvement. A forty-page pain-free assessment system you can start using today. Computer, Intelligent Computing and Education Technology Hsiang-Chuan Liu, Wen-Pei

Sung, Wenli Yao, 2014-03-26 This proceedings set contains selected Computer Information and Education Technology related papers from the 2014 International Conference on Computer Intelligent Computing and Education Technology CICET 2014 held March 27-28, 2014 in Hong Kong. The proceedings aim to provide a platform for researchers, engineers, and academics as well as industry. **The Practice of System and Network Administration** Thomas A. Limoncelli, Christina J. Hogan, Strata R. Chalup, 2016-10-25 With 28 new chapters, the third edition of *The Practice of System and Network Administration* innovates yet again. Revised with thousands of updates and clarifications based on reader feedback, this new edition also

incorporates DevOps strategies even for non DevOps environments Whether you use Linux Unix or Windows this new edition describes the essential practices previously handed down only from mentor to protégé This wonderfully lucid often funny cornucopia of information introduces beginners to advanced frameworks valuable for their entire career yet is structured to help even experts through difficult projects Other books tell you what commands to type This book teaches you the cross platform strategies that are timeless DevOps techniques Apply DevOps principles to enterprise IT infrastructure even in environments without developers Game changing strategies New ways to deliver results faster with less stress Fleet management A comprehensive guide to managing your fleet of desktops laptops servers and mobile devices Service management How to design launch upgrade and migrate services Measurable improvement Assess your operational effectiveness a forty page pain free assessment system you can start using today to raise the quality of all services Design guides Best practices for networks data centers email storage monitoring backups and more Management skills Organization design communication negotiation ethics hiring and firing and more Have you ever had any of these problems Have you been surprised to discover your backup tapes are blank Ever spent a year launching a new service only to be told the users hate it Do you have more incoming support requests than you can handle Do you spend more time fixing problems than building the next awesome thing Have you suffered from a botched migration of thousands of users to a new service Does your company rely on a computer that if it died can't be rebuilt Is your network a fragile mess that breaks any time you try to improve it Is there a periodic hell month that happens twice a year Twelve times a year Do you find out about problems when your users call you to complain Does your corporate Change Review Board terrify you Does each division of your company have their own broken way of doing things Do you fear that automation will replace you or break more than it fixes Are you underpaid and overworked No vague management speak or empty platitudes This comprehensive guide provides real solutions that prevent these problems and more
