with Nelson Goodman W V O Quine and B F Skinner to show that these poststructuralist theories are rooted in a nominalist relativist and behaviourist philosophy and develops an alternative framework using arguments from contemporary and critical realism Employing colourful illustrations from biology anthropology and psychology Hull demonstrates the rich potential of realist philosophy and concludes that it is philosophically and scientifically correct on one hand and politically advisable on the other to maintain a distinction albeit attenuated between sex and gender and sexuality and behaviour

**Animal Minds and Human Morals** Richard Sorabji, 2018-05-31 They don't have syntax so we can eat them According to Richard Sorabji this conclusion attributed to the Stoic philosophers was based on Aristotle's argument that animals lack reason In his fascinating deeply learned book Sorabji traces the roots of our thinking about animals back to Aristotelian and Stoic beliefs Charting a recurrent theme in ancient philosophy of mind he shows that today's controversies about animal rights represent only the most recent chapter in millennia old debates Sorabji surveys a vast range of Greek philosophical texts and considers how classical discussions of animals capacities intersect with central questions not only in ethics but in the definition of human rationality as well the nature of concepts how perceptions differ from beliefs how memory intention and emotion relate to reason and to what extent speech skills and inference can serve as proofs of reason Focusing on the significance of ritual sacrifice and the eating of meat he explores religious contexts of the treatment of animals in ancient Greece and in medieval Western Christendom He also looks closely at the contemporary defenses of animal rights offered by Peter Singer Tom Regan and Mary Midgley **Animal Minds and Human Morals** sheds new light on traditional arguments surrounding the status of animals while pointing beyond them to current moral dilemmas It will be crucial reading for scholars and students in the fields of ancient philosophy ethics history of philosophy classics and medieval studies and for everyone seriously concerned about our relationship with other species A Townsend Lecture Book [Finding the Monk Within](#) Edward C. Sellner, 2008 [Finding the Monk Within](#) is written with the conviction that lying deep within every person and underlying much of contemporary western and eastern cultures is an ancient memory a vital archetypal energy related to monasticism and its spirituality This book recovers that monastic memory the living presence of the past for those who desire to name and incorporate monastic values values of solitude and silence faith and compassion friendship and mentoring contemplation and leadership itself The author examines the social and religious dimensions in the fourth century that gave rise to monasticism then looks at Christian leaders from late antiquity to the medieval period associated with monasticism in both East and West who have much to teach about monastic values and their relevance for today among them Antony the first monk Augustine and Jerome John Cassian Brigit of Kildare and early Celtic monasticism Gregory the Great Benedict and Scholastica and finally Bernard of Clairvaux By studying the history of monasticism and its great heroes we come to realize that for the Christian much of what we call monastic is purely and simply what being a follower of Christ is all about and that being a monk whether inside monastic enclosures or outside in the world is simply becoming the sort of person everyone

ought to be a person who unites action and contemplation in the care of souls writes the author By becoming familiar with the stories and thought of these inspirational figures readers will be inspired to incorporate monastic perspectives and values into their own lives

A Predictive Theory of Mental Evolution and Its Consequences David A. Steinberg, 2021-02-24 The premise of this book is that the external world can be known only as an internally constructed model Therefore a careful analysis of how internal correlates are created can unify and explain disparate and fundamental scientific concerns Among these are the nature of mathematics the origin of time and a predictive theory of mental evolution whose stages culminate in an unambiguous and rigorous definition of consciousness Validation of this theory's predictions explains the sequence and meaning of Paleolithic Age artifacts and identifies a temporal origin of language Additional consequences of the theory identify strict limits of scientific knowledge and an essential commonality of mathematical logic shared by all sentient species The book will appeal to anyone interested in the origin of the human mind and a rigorous scientific explanation of the emergence of consciousness

Moffitt, 2004-07-15 This study analyzes the distinctive look of Hispanic architecture Its triangulate format originated in Islamic Spain was based on workshop techniques once used by journeyman designers and simple artisans Spain was the only European transatlantic colonial power to have once been occupied by Islamic overlords Spain's conquistadors took their traditional building methods to Latin America Formal analyses of the facades of various Latin American churches reveal them to reiterate procedures worked out in Andalusia by Islamic builders in the ninth and tenth centuries Though widely separated by time and place both share a proportionate system determining abstract ratios in both cases this regulating format was derived from manipulations of the Pythagorean triangles This trazado regulador is only expressed in ratios with no numbers and is illustrated here with 85 visual examples including measured drawings of Egyptian Greek Roman and medieval European prototypes Grounded in historical and physical data the research is partially drawn from four practical builders manuals two seventeenth century Spanish ones and two Mexican ones from ca 1640 and 1800 In an appendix Viollet le Duc a major nineteenth century architect explains architectural proportionality and the design function of the Pythagorean Triangle

**The Ashtray** Errol Morris, 2023-02-17 In 1972 philosopher of science Thomas Kuhn threw an ashtray at Errol Morris This book is the result At the time Morris was a graduate student Now we know him as one of the most celebrated and restlessly probing filmmakers of our time the creator of such classics of documentary investigation as *The Thin Blue Line* and *The Fog of War* Kuhn meanwhile was and posthumously remains a star in his field the author of *The Structure of Scientific Revolutions* a landmark book that has sold well over a million copies and introduced the concept of paradigm shifts to the larger culture And Morris thought the idea was bunk *The Ashtray* tells why and in doing so it makes a powerful case for Morris's way of viewing the world and the centrality to that view of a fundamental conception of the necessity of truth For me Morris writes truth is about the relationship between language and the world a correspondence idea of truth He has no patience for philosophical systems that aim for internal coherence and disdain the world itself Morris is after bigger game he wants to establish as clearly as possible what we know and can say about the world reality history our actions and interactions It's the fundamental desire that animates his filmmaking whether he's probing Robert McNamara about Vietnam or the oddball owner of a pet cemetery Truth may be slippery but that doesn't mean we have to grease its path of escape through philosophical evasions Rather Morris argues powerfully it is our duty to

do everything we can to establish and support it
