**Marriage and Civilization** William Tucker,2014-02-03 In his stunning new book Marriage and Civilization author William Tucker looks at the evidence from biology evolution anthropology history and culture to come to a remarkable conclusion it was the monogamous pairing of male and female unusual among mammals that led to human evolution Moreover it is monogamous marriage that has shaped Western Civilization giving us our sense of justice undergirded Western democracy and is the greatest institution we have for perpetuating human freedom and happiness Yet marriage is now under threat and perhaps not in ways that people suspect We could actually see the de facto abolition of marriage with the state taking many of the responsibilities formerly assumed by the nuclear family Among Tucker s many eye opening observations How primitive polygamy was a retrogression from the original monogamous structure of the human family Why monogamy was essential to the development of ancient Greek democracy Why it was the Catholic Church not the Bible or Christianity in general that was the great defender of monogamous marriage in Western Civilization Why polygamous societies from primitive farming communities to the Mongols to the Muslim world to the early Mormons are internally violent and have bloody borders Why same sex marriage utterly irrelevant in evolutionary terms is a distraction from the real marriage debate we should be having The prospects for monogamous marriage and the dangers if it collapses Marriage and Civilization might be the most important provocative and talked about book of the year

**Wild World** Deepak Arora,2019 Bali the langur decides to move back into the Wild World after getting fed up of chasing monkeys in the city Bhola the bear escapes

to the jungle from the brutalities of his human owner to lead a happy and satiated life On the night of Bali s welcome party Bali saves Raja the tiger from the bullets of a poacher The other animals are impressed and request him to go back to the city and help Rani the tigress to escape from the City Zoo Wild World is a whacky and hilarious tale of a runaway langur and an ever hungry bear who join paws to save the jungle from becoming a human colony **Mother's Love Knows No Language**

Dr. Sahadeva Das,2018-01-01 In this material world there is no comparison to a mother s love for a mother loves her child without any expectation of return When you look at your mother you are looking at the purest love available in the material realm This is love at first sight from the moment you open your eyes Of all the gifts that life has to offer a loving mother is the best one A mother s love is a treasure lying deep in the core of our hearts and we know It will always be there to comfort us Someone has rightly said A mother s love begins before the child is born and lasts through time and difficulties and differences and many wounds and days of joy and days of sorrow winding wearing weeping sharing changing until at the end what remains is that solid core that began as love before the child was born **Weekly World News** ,1998-05-05 Rooted in

the creative success of over 30 years of supermarket tabloid publishing the Weekly World News has been the world s only reliable news source since 1979 The online hub [www.weeklyworldnews.com](http://www.weeklyworldnews.com) is a leading entertainment news site *Wild Man from Borneo* Robert Cribb,Helen Gilbert,Helen Tiffin,2014-01-31 Wild Man from Borneo offers the first comprehensive history of the human orangutan encounter Arguably the most humanlike of all the great apes particularly in intelligence and behavior the orangutan has been cherished used and abused ever since it was first brought to the attention of Europeans in the seventeenth century The red ape has engaged the interest of scientists philosophers artists and the public at large in a bewildering array of guises that have by no means been exclusively zoological or ecological One reason for such a long term engagement with a being found only on the islands of Borneo and Sumatra is that like its fellow great apes the orangutan stands on that most uncomfortable dividing line between human and animal existing for us on what has been called the dangerous edge of the garden of nature Beginning with the scientific discovery of the red ape more than three hundred years ago this work goes on to examine the ways in which its human attributes have been both recognized and denied in science philosophy travel literature popular science literature theatre museums and film The authors offer a provocative analysis of the origin of the name orangutan trace how the ape has been recruited to arguments on topics as diverse as slavery and rape and outline the history of attempts to save the animal from extinction Today while human populations increase exponentially that of the orangutan is in dangerous decline The remaining wild men of Borneo are under increasing threat from mining interests logging human population expansion and the widespread destruction of forests The authors hope that this history will by adding to our knowledge of this fascinating being assist in some small way in their preservation **The Wild Within**

Andrew Brogan,2018-02-22 Established in 1836 the Bristol Zoo is the world s oldest surviving zoo outside of a capital city and has frequently been at the vanguard of zoo innovation In *The Wild Within* Andrew Flack uses the experiences of the

Bristol Zoo to explore the complex and ever changing relationship between human and beast which in many cases has altered radically over time Flack recounts a history in which categories and identities combined converged and came into conflict as the animals at Bristol proved to be extremely adaptive He also reveals aspects of the human animal bond however that have remained remarkably consistent not only throughout the zoo's existence but for centuries including the ways in which even the captive animals with the most distinct qualities and characteristics are misunderstood when viewed through an anthropocentric lens Flack strips back the layers of the human animal relationship from those rooted in objectification and homogenization to those rooted in the recognition of consciousness and individual experience The multifaceted beasts and protean people in *The Wild Within* challenge a host of assumptions both within and outside the zoo about what it means to be human or animal in the modern world

Chess Movies 1 Bruce Pandolfini, 2010-12-03 Lights Action Chess Chess Movies represents a new idea in the Pandolfini Chess Library series It offers instructional material with every single move diagrammed and explained Thus a chessboard and pieces are not needed to follow through This makes it possible to rely solely on the book itself as one would with a text on tactics and problems without having to set up the positions even though the present volume *Quick Tricks* contains games of ten full moves or more It's almost as if one is sitting in a movie theater watching the film roll by with the narrative carried along by subtitles But whereas a film seen in the theater just keeps going here you can stop the action and take time thinking about what you're seeing and what's being explained to you as if you were home watching on your own DVD In this first offering of the series *Quick Tricks* the reader/viewer is provided with a collection of 64 neat traps and shots in the opening illustrations often stemming from the practice of the world's best players There's a variety too so that you can sample different openings and variations All you have to do is read the beginning paragraph sit back in your living room on your favorite flight commuter bus or train ride and pleasure your way through each informative film It's also a great way to prepare for upcoming competition Just find a comfortable chair and spend a few hours watching learning and enjoying your way into shape

*Science and Religion in Neo-Victorian Novels* John Glendening, 2013-04-17 Criticism about the neo-Victorian novel a genre of historical fiction that reimagines aspects of the Victorian world from present day perspectives has expanded rapidly in the last fifteen years but given little attention to the engagement between science and religion Of great interest to Victorians this subject often appears in neo-Victorian novels including those by such well-known authors as John Fowles A.S. Byatt Graham Swift and Mathew Kneale This book discusses novels in which nineteenth-century science including geology paleontology and evolutionary theory interacts with religion through accommodations conflicts and crises of faith In general these texts abandon conventional religion but retain the ethical connectedness and celebration of life associated with spirituality at its best Registering the growth of nineteenth-century secularism and drawing on aspects of the romantic tradition and ecological thinking they honor the natural world without imagining that it exists for humans or functions in reference to human values In particular they enact a form of

wonderment the capacity of the mind to make sense of creatively adapt and enjoy the world out of which it has evolved in short to endow it with meaning Protagonists who come to experience reality in this expansive way release themselves from self anxiety and alienation In this book Glendening shows how by intermixing past and present fact and fiction neo Victorian narratives with a few instructive exceptions manifest this pattern
