The Church of the Perfect Storm Leonard Sweet, 2010-09-01 The church is heading into a perfect storm of cultural forces Will you sink beneath the waves or ride the winds of the Spirit An array of cultural forces is coming together to present the church with unprecedented challenge and unequalled opportunity Such category 5 realities as postmodernism postChristendom attacks on belief in God and the threat of global warming have coalesced to make a perfect

storm that will leave people uncertain of their place in the world and all they have previously believed in Like the disciples when Jesus calmed the storm the church can cower and cry out for relief Or when everything is spinning and whirling in the wind the church can go out to meet the storm embrace the gale and pass out kites From the Circuit Rider review Like other books Sweet has written and compiled *The Church of the Perfect Storm* is thought provoking and compelling The material flows in such a way that allows readers to grasp the gravity of the situation However as with most futuristic material there is also a sense in which readers may want to know Okay now what Where do we need to steer this ship Are mainline and evangelical churches so off course as to fail to weather the rising tides that are here and soon coming Readers of this volume may enjoy the description of a post Christendom world but they may also want to know more about the prescription for the days ahead Click here to read the entire review

A Perfect Moral Storm Stephen Mark Gardiner, Stephen M. Gardiner, 2013-03-21 Climate change is genuinely global dominantly intergenerational and takes place in a setting where our prescriptive theories are weak This perfect moral storm poses a profound challenge to humanity This book explains the storm how it makes sense of our current malaise and why better ethics can help This book argues that despite decades of awareness we are currently accelerating hard into the climate problem in a way that defies standard explanations It claims that this suggests that our current focus on the scientific and economic questions is too narrow and that the tendency to see the political problem as a traditional tragedy of the commons facing nation states is too optimistic Instead the key issue is that the current generation and especially the most affluent are in a position to pass on most of the costs of their behavior and especially the most serious harms to the global poor future generations and nonhuman nature This tyranny of the contemporary is a deeper problem than the traditional tragedy of the commons Moreover the book argues that this diagnosis helps to explain both the past failures of international climate policy e g the shadow solutions of Kyoto and Copenhagen and the current push towards geoengineering Part of the solution it argues is better public ethics We must work harder on articulating both the ethical problem and moral constraints on solutions In addition there is a role for defensive moral and political philosophy aimed at preserving the quality of public discourse
