The Political Spirituality Of Cesar Chavez Crossing Religious Borders:

The Political Spirituality of Cesar Chavez Luis D. Leon, 2014-11-14 The Political Spirituality of Cesar Chavez Crossing Religious Borders maps and challenges many of the mythologies that surround the late iconic labor leader Focusing on Chavez's own writings Leon argues that La Causa can be fruitfully understood as a quasi religious movement based on Chavez's charismatic leadership which he modeled after Martin Luther King Jr and Gandhi Chavez recognized that spiritual prophecy or political spirituality was the key to disrupting centuries old dehumanizing narratives that conflated religion with race Chavez's body became emblematic for Chicano identity and enfolded a living revolution While there is much debate and truth seeking around how he is remembered through investigating the leader's construction of his own public memory the author probes the meaning of the discrepancies By refocusing Chavez's life and beliefs into three broad movements mythology prophecy and religion Leon brings us a moral and spiritual agent to match the political leader

O'Brien, 2017 It is beyond debate that human beings are the primary cause of climate change Many think of climate change as primarily a scientific economic or political problem and those perspectives inform Kevin O'Brien's analysis But O'Brien argues that we should respond to climate change first and foremost as a case of systematic and structural violence As he points out global warming is primarily caused by the carbon emissions of the affluent emissions that harm the poor first and worst Climate change divides human beings from one another and from the earth in short global warming and climate change is violence In order to sustain a constructive and creative response to this violence he contends society needs practical examples of activism and nonviolent peacemaking O'Brien identifies five such examples from US history providing brief biographies of heroic individuals whose idealism and social commitment and political savvy can model the fight against climate change and for climate justice Quaker abolitionist John Woolman social reformer Jane Addams Catholic worker advocate Dorothy Day civil rights leader Martin Luther King Jr and union organizer Cesar Chavez These moral exemplars all of whom were motivated by their Christian faith serve as witnesses to those seeking to make peace in response to the violence of climate change **Repertoires of Racial Resistance** Miguel N. Provoking Religion Anthony Michael Petro, Petro, 2025 In the late twentieth century artists were on the front lines of the culture wars Leaders of the Christian Right in the U S made a national spectacle out of feminist and queer art blasting it as sacrilegious or pornographic and sometimes both On the bully pulpits of television and talk radio as well as in the halls of Congress conservatives denounced artists ranging from Robert Mapplethorpe and Judy Chicago to Marlon Riggs and David Wojnarowicz Conservatives alarmed by shifting sex and gender norms collided with progressive artists who were confronting sexism homophobia and racism In *Provoking Religion* Anthony Petro offers a compelling new history of the culture wars that places competing moralities of gender and sexuality alongside competing visions of the sacred The modern culture wars he shows are best understood not as contests pitting religious conservatives against secular activists but as a series of ongoing historical struggles to define the relationship between the sacred and the political Through captivating case studies of subversive artists *Provoking Religion* illuminates the underside of the culture wars revealing how progressive artists and activists rendered from those most apparently profane aspects of human life the stuff of conservatives worst nightmares their own haunting visions of the sacred

Susanne Van Doorn, MindFund, **Religion and Power** Jione Havea, 2020-07-07

Religion has power structures that require and justify its existence, spread its influence, and mask its collaboration with other power structures. Power like religion is in collaboration. Along this line, this book affirms that one could see and study the power structures and power relations of a religion in and through the missions of empires. Empires rise and roam with the blessings and protections of religious power structures, e.g., scriptures, theologies, interpretations, traditions that in return carry, propagate, and justify imperial agendas. Thus, to understand the relation between religion and power requires one to also study the relation between religion and empires. Christianity is the religion that receives the most deliberation in this book, with some attention to power structures and power relations in Hinduism and Buddhism. The cross-cultural and international contributors share the conviction that something within each religion resists and subverts its power structures and collaborations. The authors discern and interrogate the involvements of religion with

empires past and present political and ideological economic and customary systemic and local The upshot is that the book troubles religious teachings and practices that sustain as well as profit from empires
