a problem or series of identified problems in society and then grow a profitable business Growth is the most important aspect of a business's life cycle without it no business succeeds and every entrepreneur would just turn out a failure Growth means many things to many entrepreneurs and businesses It can mean making more sales generating more revenue creating more product lines expanding to new locations getting more funding in the case of startups increasing capacity by hiring and so much more Among the many things that make up growth for a business generating more sales and making more money is at the forefront of it Without more revenue no business would become self sustaining and business death would become an eventuality This is why marketing is the most important thing every business needs to succeed in to grow According to the US Chamber of Commerce 8 out of every 10 small businesses close within the first 5 years of establishment Why is this shocking statistic possible I will tell you It's obviously because of the lack of sales and generation of revenue to power the growth of the business And how do they generate revenues By having a continuous inflow of customers to serve who pay them And how do they get a steady inflow of customers By marketing continuously and driving in new prospects through brand awareness and other marketing campaign objectives Research shows that businesses that master the art of marketing early enough in their life cycle experience massive growth than those that do not Apple Inc succeeded not because they created wonderful and innovative products from the beginning but because Steve Jobs was a wonder at marketing their creations and getting them into as many offices and homes as possible So as an entrepreneur if you want to succeed with your venture or business you must focus on marketing to grow your business and become profitable Business synergy is one of the often overlooked and fastest methods to implement marketing and grow exponentially The problem is that many entrepreneurs do not necessarily pay attention to business synergy or understand it from the perspective from which they can see how powerful synergy is to the growth of their business But that's about to change In this book I want to help as many entrepreneurs as are reading this book to lift the blindfold from their eyes and get them to see the new light of synergy in the core areas of their businesses where they can implement it and quickly grow and become profitable Synergy is not just for big corporations with deep pockets large teams and sophisticated strategies that make them able to make industry shaking synergistic moves We are going to explore synergy at the microlevel The level where it even matters more for small businesses and entrepreneurs like you Let's begin

The Marketing Matrix Gerard Hastings,2013-05-02 In the hands of the corporate sector marketing has turned us into spoilt consumption obsessed children who are simultaneously wrecking our bodies psyches and planet Given the fiduciary duties of the corporation notions like consumer sovereignty customer service and relationship building are just corrosive myths that seduce us into quiescence whilst furnishing big business with unprecedented power Corporate Social Responsibility the ultimate oxymoron and its country cousin Cause Related Marketing are just means of currying favour amongst our political leaders and further extending corporate power So it is time to fight back As individuals we have enormous internal strength collectively we have and can again change the world indeed marketing itself is a function of humankind s capacity to cooperate to overcome difficulties and way predates its co option by corporations From the purpose and resilience Steinbeck s sharecroppers we re the people

we go on through Eisenhower's alert and knowledgeable citizenry to Arundhati Roy's timely reminder about the wisdom of indigenous people are not relics of the past but the guides to our future there are lots of reasons for optimism If these talents and strengths can be combined with serious moves to contain the corporate sector it is possible to rethink our economic and social priorities The book ends with a call to do just this This compelling and accessible book will be of interest across the social sciences and humanities and indeed to anyone who has concerns about the current state of consumer society It will also be particularly useful reading for those marketing students who'd prefer a critical perspective to the standard ritualization of their discipline *La Fleur's Magazine*, 2006
