Issues in Art and Design Teaching

Nicholas Addison, Lesley Burgess, 2003 Arguing for a critical approach to art and design curriculum, this volume draws together a range of ethical and pedagogical issues for trainee and newly qualified teachers of art and design in both primary and secondary schools.

Art and Design Peter Stupples, Jane Venis, 2018-01-23 This book is a selection of essays covering aspects of the history and contemporary understanding of the fields of art and design and their inter-percolation. Making things has always involved skill and thought. Thought is given to their creation so they are fit for purpose. Where the purpose is aesthetic or intellectual pleasure, the resulting object is often called art. There is however often a hierarchy placing art somewhere apart from design. But isn't some art designed? These essays investigate aspects of this dichotomy from both sides of the supposed divide to discuss the ground between.

The Gesamtkunstwerk in Design and Architecture Anders V. Munch, 2021-04-16 The history of modern design and architecture has seen many attempts to embrace and merge different art forms and to bring art into the framing of everyday life and the organisation of modern society in a process understood as total design or total architecture. These attempts were historically based on the romanticist idea of merging all art forms into a uniting and transgressing work of art, mostly associated with but certainly not limited to Richard Wagner's theoretical writings and musical dramas. This utopian dream of the Gesamtkunstwerk or Total Work of Art was intended both to bring unity to the people and to bring art into the everyday life of their homes as well as into factories, cities and even modern media. As a result, the experiments ranged from music, poetry and drama to architecture, design, visual communication and city planning. These ideas of merging art forms into more immersive and transgressive installations or design interventions to change everyday life are widespread today but their complex and often problematic roots are mostly ignored. Design and

architecture have delivered some of the broadest and most influential experiments with the Gesamtkunstwerk from garden cities for workers and corporate identity design to the German AEG corporation

Drawn to Type Marty Blake, 2021-01-14 Illustrated lettering is one of the most recognisable trends in design but how do you take your work in this area to new levels and make your projects stand out from the crowd Illustrator designer and educator Marty Blake takes you through the craft of creative lettering what you need to know about working with various media and how to incorporate image and text successfully Each chapter focuses on one technique covering its history the tools and techniques needed to achieve it along with examples from designers and illustrators from around the world all with critical reflection on what works and why Whether you're lettering by hand or digitally Drawn to Type is perfect for use alongside courses in illustration and typography and as an inspirational guide for designers looking to give the written word that visual impact

Projective Processes and Neuroscience in Art and Design Zuanon, Rachel, 2016-07-13 Recent advances in neuroscience suggest that the human brain is particularly well suited to design things concepts tools languages and places Current research even indicates that the human brain may indeed have evolved to be creative to imagine new ideas to put them into practice and to critically analyze their results Projective Processes and Neuroscience in Art and Design provides a forum for discussion relating to the intersection of projective processes and cognitive neuroscience This innovative publication offers a neuroscientific perspective on the roles and responsibilities of designers artists and architects with relation to the products they design Expanding on current research in the areas of sensor perception cognition creativity and behavioral processes this publication is designed for use by researchers professionals and graduate level students working and studying the fields of design art architecture neuroscience and computer science

Telling the Design Story Amy Huber, 2017-11-22 When presenting projects in competitive design environments how you say something is as important as what you're actually saying Projects are increasingly complex and designers are working from more sources and many designers are familiar with the struggle to harness this information and craft a meaningful and engaging story from it Telling the Design Story Effective and Engaging Communication teaches designers to craft cohesive and innovative presentations through storytelling From the various stages of the creative process to the nuts and bolts of writing for impact speaking skills and creating visuals Amy Huber provides a comprehensive approach for designers creating presentations for clients Including chapter by chapter exercises project briefs and forms this is an essential resource for students and practicing designers alike
