

"I know of no other book that has argued with such brilliance and historical breadth against the automatic pessimism that prevails in intellectual life. Where history, philosophy, economics, and biology meet, Matt Ridley has made his own rich territory, and he is its own enthralling guide. How wealth—mental as well as material—evolves and spreads is a fundamental question for our times, and *The Rational Optimist* teems with challenging and original ideas."

Siegel, 2019-12-05 How the world has become much better and why optimism is abundantly justified Why do so many people fear the future Is their concern justified or can we look forward to greater wealth and continued improvement in the way we live Our world seems to be experiencing stagnant economic growth climatic deterioration

Tupy, Gale L. Pooley, 2022-08-31 Generations of people have been taught that population growth makes resources scarcer In 2021 for example one widely publicized report argued that The world's rapidly growing population is consuming the planet's natural resources at an alarming rate the world currently needs 1.6 Earths to satisfy the demand for natural resources a figure that could rise to 2 planets by 2030 But is that true After analyzing the prices of hundreds of commodities goods and services spanning two centuries Marian Tupy and Gale Pooley found that resources became more abundant as the population grew That was especially true when they looked at time prices which represent the length of time that people must work to buy something To their surprise the authors also found that resource abundance increased faster than the population a relationship that they call superabundance On average every additional human being created more value than he or she consumed This relationship between population growth and abundance is deeply counterintuitive yet it is true Why More people produce more ideas which lead to more inventions People then test those inventions in the marketplace to separate the useful from the useless At the end of that process of discovery people are left with innovations that overcome shortages spur economic growth and raise standards of living But large populations are not enough to sustain superabundance just think of the poverty in China and India before their respective economic reforms To innovate people must be allowed to think speak publish associate and disagree They must be allowed to save invest trade and profit In a word they must be free **Entrepreneurship in the Global Economy** Henry Kressel, Thomas V.
