Women and Sacrifice

William Beers, 1992 *Women and Sacrifice* is an original and lucid book that explores the anthropology and developmental psychology of male violence in blood sacrifice and its implications in religion and culture It is the first comprehensive study of the psychology of gender and religion using the controversial ideas of Heinz Kohut and self psychology Beers not only makes an important contribution to our psychological understanding of sacrifice he explores how narcissistic anxiety fuels rituals and social structures that subordinate women He bases his provocative theory on three general premises sacrifice is traditionally performed only by men the gender specificity of sacrifice can be traced to gender specific developments of men and women and is reflected in religions throughout the world and the male violence of sacrifice is related to other forms of male violence Beers reviews the theories of symbol formation of Freud Jung Klein and Winnicott and argues that Kohut's self psychology is more appropriate for understanding the psychology of symbolic ritual The psychological claims in the book are presented in the context of social structures cultural expressions and individual and group history Beers includes critiques of such leading theorists of ritual and sacrifice as Durkheim Levi Strauss Douglas Turner Geertz Freud Jung and Girard In analyzing sacrifice among the Malekulans of Melanesia and the eucharist of the American Episcopal Church Beers develops the theory that such rituals have a psychological function that diminishes and controls women He claims that men so fear women that religious ritual excludes women in order that men can gain and retain power over them

Writing for Justice Elina Mortara, 2015-10-22 In *Writing for Justice* Elina Mortara presents a richly layered study of the cultural and intellectual atmosphere of mid nineteenth century Europe and the United States through close readings of the life and work of Victor Séjour an expat American Creole from New Orleans living in Paris In addition to writing *The Mulatto* an early story on slavery in Saint Domingue Séjour penned *La Tireuse de cartes* *The Fortune Teller* 1859 a popular play based on the famed Mortara case In this historical incident Pope Pius IX kidnapped Edgardo Mortara the child of a Jewish family living in the Papal States The details of the play's production and its reception on both sides of the Atlantic are intertwined with the events of the Italian Risorgimento and of pre Civil War America *Writing for Justice* is full of surprising encounters with French and American writers and historical figures including Hugo Hawthorne Twain Napoleon III Garibaldi and Lincoln As Elina Mortara passionately argues the enormous amount of public attention received by the case reveals an era of underappreciated transatlantic intellectual exchange in which an African American writer used notions of emancipation in religious as well as racial terms linking the plight of blacks in America to that of Jews in Europe and to the larger battles for

freedom and nationhood advancing across the continent This book will appeal both to general readers and to scholars including historians literary critics and specialists in African American studies Jewish Catholic or religious studies multilingual American literature francophone literature theatrical life nineteenth century European politics and cross cultural encounters *Adoption in America* E. Wayne Carp,2009-12-14 Collects essays that provide an overview of the history of adoption in the United States **Uncoupling Convention** Ann D'Ercole,Jack Drescher,2013-06-17 What does it mean to be member of a gay lesbian couple or family The contributors to *Uncoupling Convention* Psychoanalytic Approaches to Same Sex Couples and Families address this question by drawing on two cultural movements of the twentieth century psychoanalysis and the gay lesbian civil rights movement Taken together these traditions provide a framework for understanding and providing psychotherapeutic assistance to gay and lesbian patients who present with troubled relationships The contributors to this volume espouse a clinical focus that supplants the heterosexual perspectives of traditional psychoanalysis with new narratives about family life Drawing on cultural feminist gay lesbian and queer studies they illustrate how concepts of gender and sexuality are routinely informed by unproven heterosexist assumptions both conscious and unconscious By examining the changing developmental needs and family dynamics of gay and lesbian families the contributors broaden our very understanding of what a family is They illustrate how contrasting cultural constructions of homosexuality and family life play out in same sex couples They delineate the multiple realities of gender subjectivity both in children and in their gay parents They ponder how technology is shaping reproductive experiences as lesbians become part of the biomedical system And they explore recurrent themes of feeling different and ashamed including the shameful secrecy surrounding same sex couples financial matters In *uncoupling conventions* the contributors are effectively coupling post Freudian psychoanalysis with the insights of queer theory and the critical edge of contemporary cultural studies The result is a framework for addressing the relational and family related challenges of gay and lesbian patients that ranges far beyond traditional approaches and will benefit analytic couples and family therapists alike *Queering Family Trees* Sandra Patton-Imani,2020-06-09 Argues that significant barriers to family making exist for lesbian mothers of color in the United States One might be tempted in the afterglow of *Obergefell v Hodges* to believe that the battle has been won that gays and lesbians fought a tough fight and finally achieved equality in the United States through access to legal marriage But that narrative tells only one version of a very complex story about family and citizenship *Queering Family Trees* explores the lived experience of queer mothers in the United States drawing on over one hundred interviews with African American Latina Native American white and Asian American lesbian mothers living in a range of socioeconomic circumstances to show how they have navigated family making While the legalization of same sex marriage and adoption in 2015 has provided avenues toward equality for some couples structural and economic barriers have meant that others especially queer women of color who often have fewer financial resources have not been able to access seemingly available choices such as second parent

adoptions powers of attorney and wills Sandra Patton Imani here argues that the virtual exclusion of lesbians of color from public narratives about LGBTQ families is crucial to maintaining the narrative that legal marriage for same sex couples provides access to full equality as citizens Through the lens of reproductive justice Patton Imani argues that the federal legalization of same sex marriage reinforces existing structures of inequality grounded in race gender sexuality and class *Queering Family Trees* explores the lives of a critically erased segment of the queer population demonstrating that the seemingly color blind solutions offered by marriage equality do not rectify such inequalities *I of the Vortex* Rodolfo R. Llinas,2002-02-22 A highly original theory of how the mind brain works based on the author s study of single neuronal cells In *I of the Vortex* Rodolfo Llinas a founding father of modern brain science presents an original view of the evolution and nature of mind According to Llinas the mindness state evolved to allow predictive interactions between mobile creatures and their environment He illustrates the early evolution of mind through a primitive animal called the sea squirt The mobile larval form has a brainlike ganglion that receives sensory information about the surrounding environment As an adult the sea squirt attaches itself to a stationary object and then digests most of its own brain This suggests that the nervous system evolved to allow active movement in animals To move through the environment safely a creature must anticipate the outcome of each movement on the basis of incoming sensory data Thus the capacity to predict is most likely the ultimate brain function One could even say that Self is the centralization of prediction At the heart of Llinas s theory is the concept of oscillation Many neurons possess electrical activity manifested as oscillating variations in the minute voltages across the cell membrane On the crests of these oscillations occur larger electrical events that are the basis for neuron to neuron communication Like cicadas chirping in unison a group of neurons oscillating in phase can resonate with a distant group of neurons This simultaneity of neuronal activity is the neurobiological root of cognition Although the internal state that we call the mind is guided by the senses it is also generated by the oscillations within the brain Thus in a certain sense one could say that reality is not all out there but is a kind of virtual reality *Reproducing Rome* Mairéad McAuley,2016 *Reproducing Rome* is a study of the representation of maternity in the Roman literature of the first century CE particularly Virgil Ovid Seneca and Statius considering to what degree it reflects constructs or subverts Roman ideals of and anxieties about family and motherhood
