Professionalism Scott L. Cummings, 2011-02-21 This book is about the role of lawyers in constructing a just society Its central objective is to provide a deeper understanding of the relationship between lawyers commercial aims and public aspirations Drawing on interdisciplinary and comparative perspectives it explores whether lawyers can transcend self interest to meaningfully contribute to systems of political accountability ethical advocacy and distributional fairness Its contributors some of the world's leading scholars of the legal profession offer evidence that although justice is possible it is never complete Ultimately how much and what type of justice prevails depends on how lawyers respond to and reshape the political and economic conditions in which they practise As the essays demonstrate the possibility of justice is diminished as lawyers pursue self regulation in the service of power it is enhanced when lawyers mobilize in the political arena workplace and law school to contest it **Modernism, Romance and the Fin de Siècle** Nicholas Daly, 2000-02-10 In *Modernism*

Romance and the Fin de Siècle Nicholas Daly explores the popular fiction of the romance revival of the late Victorian and Edwardian years focusing on the work of such authors as Bram Stoker H Rider Haggard and Arthur Conan Doyle Rather than treating these stories as Victorian Gothic Daly locates them as part of a popular modernism Drawing on work in cultural studies this book argues that the vampires mummies and treasure hunts of these adventure narratives provided a form of narrative theory of cultural change at a time when Britain was trying to accommodate the new imperialism the rise of professionalism and the expansion of consumerist culture Daly's wide ranging study argues that the presence of a genre such as romance within modernism should force a questioning of the usual distinction between high and popular culture **The**

source of reference for students and researchers in the fields of business history corporate governance and business ethics This collection is an excellent starting point for understanding the field and finding areas where business history management theory and social science can intersect Canadian Business History Newsletter January 2019 **Independent Intellectuals in the United States, 1910-1945** Steven Biel, 1995-02-01 A new intellectual community came together in the United States in the 1910s and 1920s a community outside the universities the professions and in general the established centers of intellectual life A generation of young intellectuals was increasingly challenging both the genteel tradition and the growing division of intellectual labor Adversarial and anti professional they exhibited a hostility to boundaries and specialization that compelled them toward an ambitious and self conscious generalism and made them a force in the American political literary and artistic landscape This book is a cultural history of this community of free lance critics and an exploration of their collective effort to construct a viable public intellectual life in America Steven Biel illustrates the diversity of the body of writings produced by these critics whose subjects ranged from literature and fine arts to politics economics history urban planning and national character Conceding that significant differences and conflicts did exist in the works of individual thinkers Biel nonetheless maintains that a broader picture of this vibrant culture has been obscured by attempts to classify intellectuals according to political or ideological persuasions His book brings to life the ways in which this community sought out alternative ways of making a living devised strategies for reaching and engaging the public debated the involvement of women in the intellectual community and incorporated Marxism into its evolving search for a decisive intellectual presence in American life Examined in this lively study are the role and contributions of such figures as Randolph Bourne Max Eastman Crystal Eastman Walter Lippmann Margaret Sanger Van Wyck Brooks Floyd Dell Edmund Wilson Mable Dodge Paul Rosenfeld H L Mencken Lewis Mumford Malcolm Cowley Matthew Josephson John Reed Waldo Frank Gilbert Seldes and Harold Stearns *Old Dartmouth on Trial* Marilyn Tobias, 1982 In *Old Dartmouth On Trial* Marilyn Tobias successfully integrates into her account a number of existing studies on nineteenth century colleges and universities illuminating larger issues in the history of American education professionalization alumni demands for a voice in the governance of colleges and universities and the growth of the indirect power of students and faculty Stands as Exhibit A in a critical test case namely Can historical writing be meshed with organizational theory in the systematic study of higher education Thanks to Tobias s exemplary work the verdict is overwhelmingly favorable By refuting the stereotype of collegiate stagnation historian Tobias fills in crucial voids that are essential for better understanding of what David Riesman and Christopher Jencks call the university college of the mid twentieth century This work warns us that we should no longer be satisfied with chronicles of campus events that fail to connect with structural and policy studies will be most valuable if it reaches an audience of nonhistorians because it provides a superb model for using historical methods and perspective to probe organizational complexities It is good reading that enhances the real world tasks of institutional research and policy

planning Journal of Higher EducationA significant contribution to the literature documenting American institutions of the late nineteenth century This cohesive work explores the notion of changing community by focusing on a dramatic episode in Dartmouth s history While the roots of the controversy may be explained in part by the college s unique legacy Tobias carefully demonstrates how this model of community conflict is a reflection of the transformation taking place within the larger society will interest not only community historians but also educators and policy analysts This fine piece of historical analysis may well serve as a model for similar studies in the histories of community and education Public HistorianAn important addition to a small but growing list of monographs and scholarly articles that are revising our understanding of American colleges in the nineteenth century Eschewing traditional institutional history Marilyn Tobias has developed a more imaginative interpretive framework Through comparison and contrast of the public attitudes group roles and self conception of faculty students alumni and trustees of both eras Tobias demonstrates that Dartmouth underwent fundamental changes in institutional characteristics and educational mission In significant ways Tobias has broken methodologically with traditional college historians She has provided us with a number of new insights concerning the nineteenth century American college and she has furthered the efforts of certain contemporary historians to place the history of these colleges fully within the context of national cultural and institutional developments Journal of American HistoryBrings educational history into the mainstream of current American historiography and removes Dartmouth from isolation By using a community studies approach and incorporating recent findings concerning the professions urban life and the antebellum colleges the author attempts to explain institutional change through factors outside of the college to connect higher education to the broader society and to establish an agenda and at minimum a vocabulary for the study of other educational institutions during the age of modernization The interpretation of the crisis at Dartmouth is attractive and useful Especially important for researchers is the incorporation of the role of trustees students and the scientific technological faculty History of Education Quarterly

Kernan, 2014-07-14 This volume of specially commissioned original essays presents the thoughts of some of the most distinguished commentators within the American academy on the fundamental changes that have taken place in the humanities in the latter part of the twentieth century In the transformation of American higher education from the university to the demoversity the humanities have become a less and less important part of education a matter established by a statistical appendix and elaborated on in several of the essays The individual essays offer close observations into how the humanities have been affected by declining academic status by demographic shifts by reductions in financial support and by changing communication technology They also explore the effect of these forces on books libraries and the phenomenology of reading in the age of images When basic conditions change theory follows and several essays trace the appearance and effect of new relativistic epistemologies in the humanities Social institutions change as well in such circumstances and the volume concludes with studies of the new social arrangements that have developed in the humanities in recent years the attack on professionalism and the effort to transform the humanities into the social conscience of academia and even of the nation as a whole Cause and effect Who can say What the essays make clear however is that as the humanities have become less significant in American higher education they have also been the scene of unusually energetic pedagogical social and intellectual changes The contributors to the volume are David Bromwich John D. Heirs to a storied past and glamorized as modern day knights the Marine Corps the elite fighting force in America's military in fact has not always been so highly regarded As Jack Shulimson shows only a century ago the Corps identity and existence were much in question Although the Marines were formally established by Congress in 1798 and subsequently distinguished themselves fighting on the Barbary Coast their essential mission and identity remained unclear throughout most of the nineteenth century But amid the crosscurrents of industrialization technological change professionalization and reform that emerged in Gilded Age America the Corps underwent a gradual transformation that ultimately secured its significant and enduring military role In this enlightening study Shulimson argues that the Marine Corps officers inextricable ties to the Navy both hampered and aided their attempt to define their own special jurisdiction and professional identity Often treated like a poor relation the Marine officers frequently found themselves in direct competition with their counterparts in the Navy and at times the object of the latter's scorn Shulimson reveals the processes politics and personalities that converged to create these tense and sometimes embattled relations but he goes on to show how Marine officers with the Navy's blessing eventually transcended their second class role The Oxford Handbook of Empirical Legal Research Peter Cane, Herbert Kritzer, 2012-05-17 The empirical study of law legal systems and legal institutions is widely viewed as one of the most exciting and important intellectual developments in the modern history of legal research Motivated by a conviction that legal phenomena can and should be understood not only in normative terms but also as social practices of political economic and ethical significance empirical legal researchers have used quantitative and qualitative methods to illuminate many aspects of law's meaning operation and impact In the 43 chapters of The Oxford Handbook of Empirical Legal Research leading scholars provide accessible and original discussions of the history aims and methods of empirical research about law as well as its achievements and potential The Handbook has three parts The first deals with the development and institutional context of empirical legal research The second and largest part consists of critical accounts of empirical research on many aspects of the legal world on criminal law civil law public law regulatory law and international law on lawyers judicial institutions legal procedures and evidence and on legal pluralism and the public understanding of law The third part introduces readers to the methods of empirical research and its place in the law school curriculum **One Hundred Years of Social Work** Therese Jennissen, Colleen Lundy, 2011-02-17 **One Hundred Years of Social Work** is the first comprehensive history of social work as a profession in English Canada Organized chronologically it provides a critical and compelling look at the internal struggles and debates in the social work profession over the course of a century and investigates the responses of social workers to several important events A central theme in the book is the long standing struggle of the professional association the Canadian Association of Social Workers and individual social workers to reconcile advancement of professional status with the promotion social action The book chronicles the early history of the secularization and

Budgeting Aaron B. Wildavsky, 1986-01-01 In this completely revised edition of his classic work Aaron Wildavsky collects in one place the existing knowledge on budgeting Realistic budgets are an expression of practical politics Budgeting is so basic it reveals the norms by which men live in a particular political culture In dealing directly with the universe of governmental activity Wildavsky uses reliable accounts of how budgeting is carried on to capture a great deal of national political life The focus is explicitly comparative After developing a general theory of budgeting he analyzes four rich countries Britain France Japan and the United States followed by poor countries American cities and American states Wildavsky uses this analysis to develop and apply a cultural theory of budgeting explaining the degree of balance between revenue and expenditure why government grows in all industrial democracies and why there are still different rates of growth in spending He offers a critical evaluation of the first edition linking the ability of nations to make history and the various strategies of change they adopt to explain a wider range of budgetary processes

Masters of Bedlam Andrew Scull, Charlotte MacKenzie, Nicholas Herve, 2014-07-14 Through an examination of the fascinating lives and careers of a series of nineteenth century mad doctors Masters of Bedlam provides a unique perspective on the creation of the modern profession of psychiatry taking us from the secret and shady practices of the trade in lunacy through the utopian expectations that were aroused by the lunacy reform movement to the dismal realities of the barracks asylums those Victorian museums of madness within which most nineteenth century alienists found themselves compelled to practice Across a century that spans the period from an unreformed Bedlam to the construction of a post Darwinian bio psychiatry centered on the new Maudsley Hospital from a therapeutics of bleeding purging and close confinement through the era of moral treatment and nonrestraint to a fin de si cle degenerationism and despair men claiming expertise in the treatment of mental disorder sought to construct a collective identity as trustworthy and scientifically qualified professionals This fascinating series of biographies answers the question How successful were they in creating such a new identity Drawing on an extensive array of sources the authors vividly re create the often colorful and always eventful lives of these seven masters of bedlam Sensitive to the idiosyncrasies and peculiarities of each man s personal biography the authors replace hagiographical ac counts of the great men who founded modern psychiatry with fully rounded portraits of their struggles and

successes their achievements and limitations In the process *Masters of Bedlam* provides an extremely subtle and nuanced portrait of the efforts of successive generations of alienists to carve out a popular and scientific respect for their specialty and reminds us repeatedly of the complexities of nineteenth century developments in the field of psychiatry Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
