

Circular Functions

Introduction:

In this session we look at the algebra and geometry of the trigonometric functions $\sin(x)$, $\cos(x)$ and $\tan(x)$.

These three functions are usually referred to as **Trigonometric Functions**. The function the **unit circle** function refers to the fact that they are derived from the Unit Circle. The Unit Circle is a circle that has a radius of one.

We will first look at the Unit Circle, then we will **derive** the trigonometric functions and their values.

We will then go on to **graph** these functions and **solve** trigonometric equations. We will then look at **inverse** trigonometric functions and how they relate to **right-angled triangles**. We will also be **integrating** and **differentiating** trigonometric functions and **applying** these methods to real life situations.

Transformations Tim Brown,2014-01 This unit is designed to familiarize students with the ideas of how various functions
can be transformed and the effect those transformations have on equations graphs and contextual situations The function
families were chosen to be simple enough for students to readily understand and also sophisticated enough to clearly
demonstrate the effects of dilations and translations The skills and principles to be learned apply to virtually all function
families and will give a solid foundation for more advanced studies in functions The approach of this unit is primarily
investigative in nature students will examine the effects various transformations have on function equations and graphs to
develop conjectures and generalized understanding To that end the Geometry Expressions Gx software will be used
extensively as an investigative tool and a means to check the accuracy of conjectures Ideally students will have previously
completed the Intro to Unit Circle Trigonometry lesson using Gx as that introduces the general learning pattern as well as
many of the software features they will be using If they haven t used Gx before it is a good lesson to do as a review prior to
starting this unit
