**Learning from the Past, Present, and Future to Drive Profits to New Levels** Bob Sproull, 2023-11-23 The content of this book is centered around three seemingly diverse themes The first theme is why it's so important for companies to learn from the past the present and the future The author covers some of the key learnings from the distant and current past and how these learnings changed the course for many companies He discusses new learnings that have been developed in our current state and will continue to be brought forward He provides a look into the future just to make sure companies understand that they should always be looking for better ways to function The second theme is centered around problem solving problem prevention and decision making That is how to successfully define problems that already exist in your current reality how to prevent problems from occurring in the future and how to make much more effective decisions Problems have plagued many companies for many years and knowing how to follow a structured approach to solve them should prove to be very useful And perhaps even more important than solving problems is how companies can go about preventing the problems from occurring in the first place

Think about how your company might look if the plethora of problems to solve didn't exist. And with current or potential problems many decisions must be made. The final theme in this book is how to successfully implement the Theory of Constraints and then combine Lean Manufacturing, Six Sigma and the Theory of Constraints. The Theory of Constraints should be considered the missing link in most improvement initiatives. The author presents in detail why combining the Theory of Constraints with Lean and Six Sigma and all of the associated improvement tools and techniques will take your company to new levels of profitability. He introduces two new roadmaps. One roadmap is on how to implement the Theory of Constraints while the other new roadmap is how to implement my Ultimate Improvement Cycle.

*Humor and Laughter, Playfulness and Cheerfulness: Upsides and Downsides to a Life of Lightness* Willibald Ruch, Tracey Platt, René T. Proyer, Hsueh-Chih Chen, 2019-08-12

The emergence of Positive Psychology has highlighted the importance of studying the good life and how to attain it. Positive life outcomes such as well-being, thriving, flourishing and happiness were discussed and investigated. Among them different orientations to happiness were identified such as a life of pleasure, life of meaning and life of engagement. Other outcomes such as subjective and objective fulfillment in life or societal recognition have been less studied. Among the characteristics that facilitate positive outcomes the VIA classification of strengths and virtues distinguishes 24 strengths with humor, playfulness being one of them. Only a small segment of humor entered the definition of humor as character strengths, namely the parts that contain some goodness. Humor as a character strength facilitates a lot of positive outcomes such as positive emotions and positive relationships and there is a lightness accompanying humor, playfulness. The field is broader though and transcends the definition of humor as used in positive psychology in at least two ways. First, there is actually a family of overlapping but still distinct concepts with different research traditions. We include next to humor and types of humor also laughter, playfulness and cheerfulness. We think that more research is needed on how they do overlap and what makes them distinct. Second, while positive psychology is interested in the goodness of what we do, we want to stress that there is the need to study the non-virtuous parts as well. That is, laughter may not only be expressing amusement but scorn directed at people; humor may be benevolent but there is also sarcasm and playfulness may elicit positive emotions but also risk-prone and immature types of behavior. Therefore, the aim of this Research Topic was to collect current perspectives on humor, playfulness, laughter and cheerfulness in both adults and children to study their full diversity but also interrelations and overlapping features to introduce new instruments or ways for their assessment in future studies and to study their causes and consequences in a variety of life domains. We encouraged studies on differences due to gender or nationality, the embodiment in different groups, e.g., class clowns, psychiatric patients or whether or not they can be trained. We also welcomed contributions from adjacent disciplines, e.g., education, leisure studies or therapy, counseling and different regions of the earth. The outcome is a set of 33 manuscripts from altogether 101 authors. Not all areas are covered and not all aims were met while we made progress, there is much left to do. In this sense, the merging of these topics may be the first milestone but

like every milestone it only marks the beginning of a long journey
