Rosenbaum**

## **Testicular Cancer Treatment Guidelines:**

**Diagnosis and Management of Testicular Cancer** Susanne Krega, 2015-05-27 This book presents the views of leading European experts on the diagnosis and management of testicular cancer with coverage of current hot topics in the field. It opens by providing an overview of the recommendations in the most recent consensus paper from the European Germ Cell Cancer Consensus Group which is based on interdisciplinary cooperation among urologists, medical oncologists, radio oncologists, pathologists, and basic scientists. The remainder of the book focuses on areas of controversy in the diagnosis, treatment, and follow up of testicular cancer. In each case, the evidence base is discussed and results from the most recent studies are reviewed, drawing attention to new findings that might alter treatment recommendations. The treatment-related chapters cover a broad range of issues, including the best approach in patients with poor prognosis and recurrent disease and those with long-term toxicities. Relevant aspects of survivorship care are also addressed. The book will help clinicians and practitioners to achieve the goals of minimizing therapy and its side effects without reducing efficacy in low-stage disease, improving the cure rate in advanced disease, and enhancing follow-up and long-term survivorship. [A Guide to Management of Urological Cancers](#) Prabhjot Singh, Brusabhanu Nayak, Sridhar Panaiyadiyan, 2023-10-09 The book provides a comprehensive review of common uro-oncology cases, mainly focusing on its management aspect. It includes diagnosis and clinical staging, surgical management, pathological staging, adjuvant treatment, and follow-up. It provides current evidence-based approaches for the management of common urological malignancies. All the chapters are written uniformly in a simple yet informative manner by experts in their respective fields. It contains well-prepared illustrations, relevant clinical images, and flowcharts. The book is helpful for practicing urologists, uro-oncologists, oncologists, as well as urology trainees, uro-oncology fellows, in providing a holistic approach to cancer patients. It helps them to develop critical thinking and encourages discussion toward improving the overall care of the patients. **Modern Management of Testicular Cancer** Siamak

Daneshmand, 2019-07-10 In consultation with Consulting Editor Dr Samir Taneja, Dr Sia Daneshmand has put together a state-of-the-art issue of the Urologic Clinics devoted to Modern Management of Testicular Cancer. The issue focuses on surgical techniques and diagnostic modalities for testicular cancer. Clinical review articles are specifically devoted to the following: Imaging For Testicular Cancer; Management of Stage I Germ Cell Tumors; Management of Stage II Germ Cell Tumors; Current Management Of Disseminated GCT; Post Chemotherapy Resection of Residual Mass in NSGCT; Indications For Surgery in Disseminated Seminoma; Growing Teratoma Syndrome; Management of The Primary Testicular Tumor; High Dose Chemotherapy and Autologous Stem Cell Transplantation; mRNA As Biomarkers For Germ Cell Tumors; Minimally Invasive RPLND; Is There a Role; Complications of RPLND; Preservation of Fertility in Testis Cancer; Management. Readers will come away with the latest information they need to optimize surgical and management outcomes in the patient with testicular cancer. **Standard Treatment Guidelines—A Manual for Medical Therapeutics, 6e** Sangeeta Sharma, GR
