A comparative study of elite English-medium schools, public schools, and Islamic madaris in contemporary Pakistan Akhtar Hassan Malik,2015-04-12 This ethnographic study examines the role of differing school knowledge in reproducing various social classes in the society It was observed that an unequal availability of capital resources agents class habitus and the type of their cultural currency act as selection mechanisms that clearly favour some social groups over others The ruling classes ensure the transfer of their power and privilege to their children by providing them with quality education in elite schools The disadvantaged classes are excluded from these unique institutions by both social and economic sanctions They have no other option than to educate their children either in public schools or Islamic madaris As a result inequitable educational opportunities consolidate the existing social class hierarchy

Williams, Wendy D. Bokhorst-Heng, 2016-07-08 This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation Authors voices come from a variety of contexts some historical some contemporary some providing analyses over time But they all consider the changing portrayal of diversity belonging and exclusion in multiethnic and diverse societies where silenced invisible marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative The authors discuss portrayals of past exclusions around religion ethnicity sexual orientation as they look at the shifting boundaries of insider and outsider This book is thus about who we are not only demographically but also in terms of the past especially how and whether we teach discredited pasts through textbooks The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive critical and positively bonding

Foster,Keith A. Crawford,2006-04-01 The pages of this book illustrate that as instruments of socialization and sites of ideological discourse textbooks are powerful artefacts in introducing young people to a specific historical cultural and socioeconomic order Crucially exploring the social construction of school textbooks and the messages they impart provides an important context from within which to critically investigate the dynamics underlying the cultural politics of education and the social movements that form it and which are formed by it The school curriculum is essentially the knowledge system of a society incorporating its values and its dominant ideology The curriculum is not our knowledge born of a broad hegemonic consensus rather it is a battleground in which cultural authority and the right to define what is labelled legitimate knowledge is fought over As each chapter in this book illustrates curriculum as theory and practice has never been and can never be divorced from the ethical economic political and cultural conflicts of society which impact so deeply upon it We cannot escape the clear implication that questions about what knowledge is of most worth and about how it should be organized and taught are problematic contentious and very serious *Oswaal Karnataka SSLC | Chapterwise & Topicwise | Question Bank Class 10 | Social Science Book | For Board Exams 2025* Oswaal Editorial Board,2024-07-17 What are your new benchmarks for this new academic year Do better than the previous year Perfect every concept every topic and every question from the very beginning You said it we heard it Success is neither magical nor mysterious Success is the natural consequence of consistently applying fundamentals E James Rohn As we usher into the brand new Academic Year 2024 25 Oswaal Books with its all new Question Banks empowers you to perfect your learning consistently These Question Banks have been updated for 2024 25 with utmost care They are a unique blend of all the Board Specified Typologies of Questions Solved KTBS Textbook

Saha,2004-01-01 Today new and ever more pernicious forms of terrorist violence threaten the world Because these new forms of violence are so often linked to religious radicalism modern terrorism has challenged the secular ethics of contemporary civil society There is a pressing need to understand modern religious movements that have added militancy and belligerence as fundamental elements of religious practice Contributors to this volume painstakingly tackle the question of how to define the contours of current religious fundamentalism as they examine the private and public postures of fundamentalist rhetoric the importance of its regional variants and the damage it can do to regional and national education systems Their analysis tracks trends in religious movements that aspire to radicalize reform and violently topple governments and nations while highlighting the difference between fundamentalist interpretations and other longstanding juridical
