Tol, 2009-05-07 Land has long been overlooked in economics That is now changing A substantial part of the solution to the climate crisis may lie in growing crops for fuel and using trees for storing carbon This book investigates the potential of these options to reduce greenhouse gas emissions estimates the costs to the economy and analyses the trade offs with growing food The first part presents new databases that are necessary to underpin policy relevant research in the field of climate change while describing and critically assessing the underlying data the methodologies used and the first applications

Challenges and opportunities for enhancing sustainable cowpea production: proceedings of the World Cowpea Conference III held at IITA, 4-8 September 2000, Annual Report of Purdue University Purdue University, 1875 *Agricultural Price Distortions, Inequality, and Poverty* Kym Anderson, John Cockburn, Will Martin, 2010-03-17 The prices of farm products are crucial determinants of the extent of poverty and inequality in the world. The vast majority of the world's poorest households depend to a considerable extent on farming for their incomes while food represents a large component of the consumption of all poor households. For generations food prices have been heavily distorted by government policies in high income and developing countries. Many countries began to reform their agricultural price and trade policies in the 1980s but government policy intervention is still considerable and still favors farmers in high income countries at the expense of many farmers in developing countries. What would be the poverty and inequality consequences of the removal of the remaining distortions to agricultural incentives? This question is of great relevance to governments in evaluating ways to engage in multilateral and regional trade negotiations or to improve their own policies unilaterally. *Agricultural Price Distortions, Inequality, and Poverty* analyzes the effects of agricultural and trade policies around the world on national and regional economic welfare on income inequality among and within countries and on the level and incidence of poverty in developing countries. The studies include economy wide analyses of the inequality and poverty effects of own country policies compared with rest of the world policies for 10 individual developing countries in three continents. This book also includes three chapters that each use a separate global economic model to examine the effects of policies on aggregate poverty and the distribution of poverty across many identified developing countries. This study is motivated by two policy issues: first the World Trade Organization's struggle to conclude the Doha Round of multilateral trade negotiations in which agricultural policy reform is again one of the most contentious topics in the talks and

second the struggle of the developing countries to achieve their Millennium Development Goals by 2015 notably the alleviation of hunger and poverty which depends crucially on policies that affect agricultural incentives [Resources in Education](#) ,1975 Serves as an index to Eric reports microform **Annual Report - Office of Water Resources Research** United States.
