Education in Cambodia Vincent McNamara, Martin Hayden, 2022-05-14 This book is the most comprehensive account yet published about the education system in Cambodia. It covers all system levels and draws upon the knowledge and insights of a wide range of leading Cambodian and foreign scholars. The book focuses on how the system has developed and is making progress. Significant achievements over the past two decades are evident but many problems remain including the poor quality of teaching research and institutional management. Under funding is an ongoing obstacle but so too is a bureaucratic culture of resistance to change, a history of weak governance and an anti-reform sentiment deriving from a teacher-centred and exam-driven curriculum. Achieving international standards must now be the system's highest priority. To this end the system must rid itself of conservatism, complacency and manipulation by parochial vested interests.

English Studies in India Banibrata Mahanta, Rajesh Babu Sharma, 2018-11-03 This volume is a collection of scholarly papers that explore the complex issues concerning English Studies in the present Indian context. The discussions in this volume range from historical perspectives to classroom-specific pedagogies, from sociological and political hierarchies to the dynamics of intellectual development in the English language environment. Interrogating both policy and practice pertaining to English Studies in the context of Indian society, culture, history, literature and governance, the chapters seek to formulate contemporary perspectives to these debates and envision alternative possibilities. Since the introduction of English to India more than 2 centuries ago, the language has transmuted the very fabric of Indian society, culture, history, literature and governance. The idea of India cannot be conceived in its entirety without taking into consideration the epistemological role that English has played in its formation. The present globalized world order has added dimensions to English Studies which are radically different from those of India's colonial and postcolonial past. It is therefore imperative that the multitudinous shades and shadows of the discipline be re-examined with inputs drawn from the present context. This volume is for scholars and researchers of English literature and language studies, linguistics and culture studies and others interested in exploring new paradigms of engagement with the disciplinary formulation of English Studies in India.
