**Terrorism and the law of War: Trying Terrorists as War Criminals before Military Commissions (updated ed.)** Jennifer Elsea, 2001 The Fight Against Terrorism and Crisis Management in the Western Balkans I. Prezelj, 2008-02-06 Terrorism is not the only threat that causes the emergence of crises. The so-called crisisification of our security environment also seems to be rising due to many other factors. Such an environment is generating many crises related to politico-military conflicts, natural disasters, infectious diseases, information disruptions, ethnic or religious violence, and others. Many of these crises are completely or nearly completely unexpected and have a strong effect on the security of individual people, states, and the international community. Crisis has become the key word instead of war. The awareness of this is partially driven by the growing role of electronic media bringing negative news and reports to nearly all homes and partially by objective technical factors that allow the fast escalation of local crises to the international level. Globalization therefore has a strong subjective and objective impact on the understanding of security.

The Rhetoric of Terror Marc Redfield, 2009-08-25 The terrorist attacks of September 11, 2001, did symbolic as well as literal damage. A trace of this cultural shock echoes in the American idiom 9/11, a bare name/date conveying both a trauma and the unspeakable that happened then and a claim on our knowledge. In the first of the two interlinked essays making up *The Rhetoric of Terror*, Marc Redfield proposes the notion of virtual trauma to describe the cultural wound that this name/date both deflects and relays. Virtual trauma describes the shock of an event at once terribly real and utterly mediated. In consequence, a tormented self-reflexivity has tended to characterize representations of 9/11 in texts, discussions, and films such as *World Trade Center* and *United 93*. In the second half of the book, Redfield examines the historical and philosophical infrastructure of the notion of war on terror. Redfield argues that the declaration of war on terror is the exemplary postmodern sovereign speech act: it unleashes war as terror and terror as war while remaining a crazed even in a certain sense, fictional performative utterance. Only a pseudosovereign, the executive officer of the world's superpower, could have declared this absolute phantasmatic yet terribly damaging war. Though politicized terror and absolute war have their roots in the French Revolution and the emergence of the modern nation-state, Redfield suggests that the idea of a war on terror relays

the complex spectral afterlife of sovereignty in an era of biopower global capital and telecommunication A moving wide ranging and rigorous meditation on the cultural tragedy of our era The Rhetoric of Terror also unfolds as an act of mourning for Jacques Derrida Derrida s groundbreaking philosophical analysis of iterability iterability as the exposure to repetition with a difference elsewhere that makes all technics signification and psychic life possible helps us understand why questions of mediation and aesthetics so rapidly become so fraught in our culture why efforts to repress our essential political psychic and ontological vulnerability generate recursive spasms of violence why ethical living together involves uninsurable acts of hospitality The Rhetoric of Terror closes with an affirmation of eirenic cosmopolitanism Beating International Terrorism Stephen Sloan,1992-10 **Terrorist Attack Against United States Military Forces in Dhahran, Saudi Arabia** United States. interrogation of terrorists and compares several alternative ideas to the administration's enemy combatant policy under a methodology that looks at questions of lawfulness the balance between liberty and security and institutional efficiency In the end this book recommends using the Foreign Intelligence Surveillance Court to monitor a narrow regime of preventive detention only to be used under certain prescribed circumstances where interrogation and or incapacitation are the justifications This book is an essential reference for collections in American studies political science and national security studies BOOK JACKET      *International Politics* Mr. Rohit Manglik, 2023-06-23 In this book we will study about global power relations diplomacy conflict resolution and international organizations
