Penser Global Edgar Morin:

Penser global Michel Wieviorka, Laurent Lévi-Strauss, Gwenaëlle Lieppe, 2015-05-05 Les sciences humaines et sociales ne sont plus le monopole d'une partie du monde et il faut repenser les valeurs universelles partir des critiques qui en sont faites de l'intérieur des sociétés occidentales et surtout de l'extérieur lorsque celles-ci ignorent l'apport d'idées nées ailleurs L'expression Penser global constitue un signe de ralliement pour cet ouvrage qui rassemble les contributions de nombre de chercheurs en sciences sociales les plus reconnus dans le monde présents lors du colloque de 2013 pour le 50^e anniversaire de la Fondation Maison des sciences de l'homme tout comme elle a été le thème principal du premier numéro de la revue Socio Penser global c'est synthétiser des logiques mondiales et articuler ce niveau d'analyse d'autres niveaux régionaux nationaux ou encore locaux

The Global History of Portugal Carlos Fiolhais, José Eduardo Franco, José Pedro Paiva, 2021-12-06 For thousands of years Portugal has been the point of arrival and departure for peoples cultures languages ideas fashions behaviours beliefs institutions and produce While its miscegenation and global multimodal activity enriched the world in many ways it also provoked violence war suffering and resistance The Global History of Portugal contains 93 chapters grouped into five parts Pre history Antiquity Middle Ages Early Modern period and Modern World Each chapter begins with an event interpreted in the light of global history Each part opens with an introduction offering a perspective of the period in question The three Editors five Scientific Coordinators João Luís Cardoso Carlos Fabião Bernardo Vasconcelos e Sousa Catia Antunes and António Costa Pinto and ninety Contributors offer a critical and analytical synthesis of the history that originated in Portuguese territory or passed through it stimulating the process of encounter and dis encounter in today's global world The history presented gives special attention to the world that moulded Portugal and the Portuguese and to the ways Portugal configured the world It seeks to identify and understand the transversal entanglements of historic impact and the impulses these gave to the construction of Portugal and the world Contemporary reflection and academic scholarship on the global history of leading nations has stimulated a rethinking of the past and a more comprehensive recognition of legacy Historians can no longer overlook the wider world with which their country of investigation has interacted Portugal's role in the dynamic circulation of peoples and ideas makes it global history not only unique by way of what took place but also in terms of a potential academic template for better understanding of how the past shapes the present and more particularly the importance of acknowledging a country's past historic missteps and how these are dealt with by contemporary populations

Digital Technologies and African Societies Julien Atchoua, Jean-Jacques Maomra Bogui, Saikou Diallo, 2020-11-17 The integration and use of information and communication technologies ICT in African countries is increasingly observable in various sectors of activity banking education trade etc despite a digital divide still relevant ICT has

become a major sector of the recent growth of a new informal economy in African cities Ch neu Loquay 2008 This question has been at the heart of various international meetings An overall positive and even utopian momentum is generally heard about the contribution of digital technologies to the development of African states The adoption or appropriation of digital technologies by Africans is presented in many speeches by politicians or institutions involved in the field of cooperation and international development as an important issue for the development of this continent These different considerations give rise to reflections on the following themes Social Media and Public Space in Africa Challenges of the digital economy in Africa ICT and modernization of higher education in Africa *The Theory of Statistical Implicative Analysis* Régis

Gras,Antoine Bodin,Raphaël Couturier,Pablo Gregori,2023-11-29 This book summarizes the methods and concepts of Statistical Implicative Analysis SIA created by R gis Gras in the 1980s to study in a new way the behavioural responses of French pupils to mathematics tests Using a multidimensional non symmetrical data analysis method SIA crosses a set of subjects or objects with a set of variables It effectively complements traditional correlational and psychometric methods SIA through its various extensions is today presented as a broad Artificial Intelligence method aimed at extracting trends and possible causalities in the form of rules from a set of variables It is based on the unlikeliness of the existence of these relationships i e on the relative weakness of their counter examples compared to what chance alone would produce It establishes a dual topological relationship between the set of subjects and the set of variables Many applications of this approach driving forces or crucibles for the development of SIA have concerned and still concern various fields such as didactics evaluation and assessment psychology sociology medicine biology economics art history and others Key Features Presents the foundations and representations of SIA Provides extensions of variable sets and subjects Includes a bonus exercise **The New Nihilism** Costantino Esposito,2024-11-01 In this highly engaging book Costantino Esposito argues

that nihilism is not merely the loss of the classic values of the Western tradition rather it presents a critical opportunity to ask pertinent timely questions about the meaning of self and the world Nihilism is a problem that has troubled the culture philosophy and worldview of people and societies for more than a century a problem that seemed thanks to the advance of cultural relativism to have become an obvious and globally shared condition However in recent years the conversation around nihilism has begun to change The questions that nihilism once declared impossible to answer questions about the ultimate meaning of self and reality the truth of the person and history our desire to understand ourselves in relation to the infinite are reemerging in today s culture and proving to be profound reasonable and of vital importance In its classical form nihilism is the loss of values and ideals but its modern iteration manifests as an irreducible need more basic but far more challenging Esposito suggests that rather than being an obstacle nihilism can become an opportunity to search for true meaning for our experiences in the world With philosophical rigor he intercepts and narrates this new phenomenon focusing on social trends poetic voices philosophical and scientific visions ethical problems and aesthetic experiences The New

Nihilism unravels and makes sense of the real stakes of the existential crisis of our time **Global Risks and International Law** Sarah Cassella, 2023-12-11 Global risks present formidable challenges to international law Although they have long been identified in many other scientific disciplines they are currently only considered on a sectoral basis in international law in the absence of a legal definition The aim of this book is threefold to identify the main elements that characterise global risks in a legal perspective to determine the characteristics that make them a new category of risk and to analyse the changes they bring about in the main mechanisms of international law Drawing on the relationship between international law and other legal systems and in particular national law this book highlights possible responses to the challenges posed by global risks The study is based on extensive practice related to the examples of climate change and pandemics but opens up perspectives on conclusions that could be common to other global risks such as financial risks or cyber risks Interview with the author **La Sociologie chinoise avant la Révolution** Qu Jingdong, Li Peilin, 2017-06-08 En Chine la premi re moiti du XXe si cle est marqu e par l effondrement du syst me des dynasties les invasions trang res l affrontement des courants scientifiques et le d veloppement du m contentement populaire Et on assiste l mergence de grands courants de pens e dans le domaine des humanit s et le d veloppement de la sociologie chinoise Alimentação: Avanços & Controvérsias Juliana T.
