

FRONT SEATS WITH ELECTRIC CONTROL

Adjusting the seat position

To move the seat base forwards or back, move switch 4 forwards or backwards.

To raise or lower the seat base, move switch 4 upwards or downwards.

Adjusting the seatback:

To tilt the seatback, move the top of switch 3 forwards or backwards.

Make sure that the seatbacks are correctly locked in place.

Adjusting the lumbar support on the driver's seat

Lower handle 5 to increase the support and lift to decrease it.

Special note

On equipped vehicles, buttons 2 are used to store the chosen driving position (refer to the following page).

Heated seats

(depending on vehicle)

With the engine running, turn control 1 to either position 1, 2 or 3 (depending on the temperature required). An indicator light on the instrument panel lights up once the front seat heating system is operating.

The system, which has a thermostat, decides whether or not the heating is needed.

For safety reasons, carry out any adjustments when the vehicle is not being driven.

We would advise you not to recline the seatbacks too far to ensure that the effectiveness of the seat belts is not reduced.

Nothing should be placed on the floor (area in front of driver) as such objects may slide under the pedal during braking manoeuvres, thus obstructing its use.
