

## Circular Functions

### Introduction:

In this chapter, we look at the algebra and geometry of the trigonometric functions  $\sin(x)$ ,  $\cos(x)$  and  $\tan(x)$ .

These functions are naturally defined in a **Geometric** **Context**. But because the **Unit Circle** function refers to the unit circle (we will derive this later), this **Unit Circle** is what the book refers to here.

We will look back at the Unit Circle, however, **at** **convenient** **or** **relevant** **convenient** **times**.

We will also go over a **geometric** **context** and **algebraic** **context** **of** **trigonometric** **functions** (as described in terms of **Unit** **of** **trigonometric** **functions** **that** **can** **be** **used** **to** **find** **in** **your** **equations**). We will **not** **be** **using** **trigonometric** **functions** **that** **are** **not** **used** **in** **this** **chapter**.

**Transformations** Tim Brown,2014-01 This unit is designed to familiarize students with the ideas of how various functions  
can be transformed and the effect those transformations have on equations graphs and contextual situations The function  
families were chosen to be simple enough for students to readily understand and also sophisticated enough to clearly  
demonstrate the effects of dilations and translations The skills and principles to be learned apply to virtually all function  
families and will give a solid foundation for more advanced studies in functions The approach of this unit is primarily  
investigative in nature students will examine the effects various transformations have on function equations and graphs to  
develop conjectures and generalized understanding To that end the Geometry Expressions Gx software will be used  
extensively as an investigative tool and a means to check the accuracy of conjectures Ideally students will have previously  
completed the Intro to Unit Circle Trigonometry lesson using Gx as that introduces the general learning pattern as well as  
many of the software features they will be using If they haven t used Gx before it is a good lesson to do as a review prior to  
starting this unit
