

**Meet the 22-year-old with a big idea for cleaning up the Great Pacific Garbage Patch.**

One young ocean lover is confronting this challenge head on. At just 22, Boyan Slat has created a barrier system that's designed to collect and remove trash from the Pacific Ocean without disrupting marine life. A Dutch inventor and entrepreneur, Slat is the founder and CEO of The Ocean Cleanup, a foundation dedicated to developing advanced technologies to rid the oceans of pollution. When he was 16, Slat came up with the ambitious idea to clean up the oceans while he was diving in Greece and came across more plastic bags than fish. In the years since that dive he's dedicated countless hours to the project. "I really think the only way to show that it can be done is to go out there and try it," he says.

- 2.1 Explain TWO ways in which your vision influences your actions and behaviour. (2x2)  
**TWO marks for a fully explained answer.**  
Possible answers could be:  
 • Your vision becomes your mission. ✓✓  
 • A vision gives you focus and motivation. ✓✓  
 • To have a vision gives you better understanding of what your goals should be and how to achieve it.  
 • Vision affects those around you and your behaviour and it reflects your commitment to your goals. L2
- 2.2 Give TWO reasons why Boyan Slat's vision helped him achieve his goal. (2x2)  
**TWO marks are given for each reason.**  
Possible answers could be:  
 • Slat now knows what he wants to achieve so he can more easily focus on how he wants to achieve it. ✓✓  
 • His vision made him very enthusiastic about his cause which in turn made him seek like-minded people to help him achieve it. ✓✓  
 • His vision may have the ability to change the future and helping his community and not disappointing everyone's trust in his invention will help him achieve his goal. L1
- 2.3 Give recommendations as to why an intervention plan should be implemented by the government to curb plastic waste. (3x2)  
**TWO marks are given to each fully explained recommendation.**  
Possible answers could be:  
 • An intervention plan is a community-based programme that can have a very positive influence. ✓✓  
 • A government supported intervention program can help reduce the amount of plastic waste generated within a community. ✓✓  
 • An intervention program can help educate people about why plastic waste is such a big problem. ✓✓  
 • If people are educated about WHY they should lessen their plastic footprint, it will be easier to convince them to actually do something about it. L3

*Expanding Boundaries: Systems Thinking in the Built Environment* Guillaume Habert, Arno Schlueter, 2016-08-15

Consuming over 40% of total primary energy the built environment is in the centre of worldwide strategies and measures towards a more sustainable future To provide resilient solutions a simple optimisation of individual technologies will not be sufficient In contrast whole system thinking reveals and exploits connections between parts Each system interacts with others on different scales materials components buildings cities and domains ecology economy and social Whole system designers optimize the performance of such systems by understanding interconnections and identifying synergies The more complete the design integration the better the result In this book the reader will find the proceedings of the 2016 Sustainable Built Environment SBE Regional Conference in Zurich Papers have been written by academics and practitioners from all continents to bring forth the latest understanding on systems thinking in the built environment Complex Problem Solving

Beyond the Psychometric Approach Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In abroad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e g minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holist approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained **International Conference on Education and Management Science (ICEMS2014)**
