Cross-Cultural Perspectives on Hagiographical Strategies Massimo A. Rondolino, 2017-01-12 This book examines the potential of conducting studies in comparative hagiology through parallel literary and historical analyses of spiritual life writings pertaining to distinct religious contexts In particular it focuses on a comparative analysis of the early sources on the medieval Christian Saint Francis of Assisi 1182-1226 and the Tibetan Buddhist Milarepa c. 1052-1135 up to and including the so-called standard versions of their life stories written by Bonaventure of Bagnoregio 1221-1274 and Tsangnyen Heruka 1452-1507 respectively The book thus demonstrates how in the social and religious contexts of both 1200s Italy and 1400s Tibet narratives of the lives, deeds and teachings of two individuals recognized as spiritual champions were seen as the most effective means to promote spiritual doctrinal and political agendas Therefore as well being highly relevant to those studying hagiographical sources this book will be of interest to scholars working across the fields of religion and the comparative study of religious phenomena as well as history and literature in the pre-modern period Harley and Me Bernadette Murphy, 2017-05-30 Bernadette Murphy's luminous book shows us how to take risks that make us fierce and vulnerable knowing that true strength is about being generous as much as it is about not giving in Emily Rapp Black author of *The Still Point of the Turning World* and *Poster Child* What happens when women in midlife step out of what's predictable For Bernadette Murphy learning to ride a motorcycle at forty-eight becomes the catalyst that transforms her from a settled wife and professor with three teenage children into a woman on her own The confidence she gained from mastering a new skill and conquering her fears gave her the courage to face deeper issues in her own life and start taking risks It is a fact that men and women alike become more risk-averse in our later years which according to psychologists and neuroscience is exactly what we should not do And Murphy stresses that while hers is a story of transformation using a physical risk emotional and educational risks can serve the same beneficial purpose for other women Murphy uses her own story to explore the larger idea of how risk changes our brain chemistry how certain personality types embrace dangerous behavior and why it energizes them and why women's expectations change once estrogen levels drop after the childbearing years She also explores the idea of women and risk in pop culture why there are so few stories of the conquering heroine instead of hero Surely *Thelma and Louise* driving off the cliff should not be our only pop culture reference for women finding true freedom

With scientific research and journalistic interviews weaving through a page turning road trip narrative *Harley and Me* is a compelling look at how one woman changed her life and found deeper meaning out on the open road *The Five-Faced Hindu God and My Tryst with Five Super Souls* Siddhartha Ganguli, 2025-03-26 The Foreword by Professor Robert Morace of Daemen College Amherst New York USA This unique volume is an endeavour to build a bridge between Science and Spirituality The Five Super Souls are three scientific and two spiritual all are very dear to the author's heart To link the essence of their teachings with religion the Five Faced Hindu God Heramba has stepped into the beginning Then there has been a rapid shift to the cosmos where normal visible matter are only 5 percent whereas Dark Matter and Dark Energy constitute 27 and 68 percent respectively of the pie of the universe In Hinduism the god of preservation Lord Vishnu and his eighth incarnate Lord Krishna and the God of destruction Lord Shiva are dark in colour Even Goddess Kali who emerged from the forehead of Goddess Durga is a fierce ferocious dark deity These gods and goddesses in their idol forms represent dark matter and when life is infused into them by their genuine devoted worshippers they become most powerful sources of dark energy The author explains it very clearly through the earthly sports leela of the two avatars Sri Krishna Chaitanya and Sri Sri Ramakrishna It is a one stop reading and at the end of the smart exposure you feel that Science and Spirituality are inseparable Nothing really exists that we in general parlance regard as miracles THE THIRD EYE—The Mystery of Sri Sri Ramakrishna's Visions Dr. Siddhartha Ganguli, 2024-11-21 The 19th century Hindu super saint Avatar Sri Sri Ramakrishna descended on earth as a God incarnate to bring about harmony between different religions some of those believing in gods without forms and a few having faith on gods and goddesses with forms He was an evangelist of spirituality rather than a religious missionary His every step every move was based on his clear visions of the far and near pasts as well as the proximal and distant futures This was possible because of the mystical powers of his open and active third eye The author who is until now the only Ramakrishna scholar who has been studying him deeply bio behaviourally explains with adequate authentic supportive data that the third eye is not an imaginary concept of a creative thinker It is very much a power of the human brain's Pineal Gland It is the only sensory organ that the subtle bodied soul carries to the post death world after leaving the two biological eyes in the lifeless mortal body The book includes a list of all third eye powers that have been discovered until now and also talks about the astha siddhis the eight very special powers that the yogis acquire through sadhana There is a brief discussion also on the seven planes of existence and the post death realms where the souls move once we die
