precarious employment and privacy concerns to market monopoly and cybercrime They all are fertile ground for researchers as established laws and regulations organizational structures business models value networks and workflow routines are contested and displaced by newer alternatives This Research Handbook offers a rich and interdisciplinary synthesis of some of the current thinking on the digital transformations underway Making Sense Bill Cope, Mary Kalantzis, 2020-01-30 Explains the multimodal connections of text image space body sound and speech in both old and new computer mediated Blockchain: Capabilities, Economic Viability, and the Socio-Technical Environment Nils communication systems Braun-Dubler, Hans-Peter Gier, Tetiana Bulatnikova, Manuel Langhart, Manuela Merki, Florian Roth, Antoine Burret, Simon Perdrisat, 2020-06-16 Blockchain is widely considered a new key technology. The Foundation for Technology Assessment TA SWISS has proposed a comprehensive assessment of blockchain technologies With this publication TA SWISS provides the much needed social contextualisation of blockchain The first more technical part of the study takes an in depth look at how blockchain functions and examines the economic potential of this technology By analysing multiple real world applications the study sheds light on where the blockchain has advantages over traditional applications and where existing technologies continue to be the better solution. The second part of the study examines how blockchain became mainstream. It explores the origins of blockchain in the early history of information technology and computer networks The study also reveals the impact blockchain has on industrial and public spaces Finally it discusses the social implications and challenges of blockchain against the background of a new socio technical environment From Miracle to Menace David Yager, 2019-03-26 A miracle Coal oil and natural gas the carbon based fossil fuels that powered the Industrial Revolution and civilization s rapid advancement A menace Climate change has how convinced many that carbon emissions are the world's greatest challenge The necessity and benefits of decarbonizing the global industrial and energy complex are well articulated What is not explained is this will require the largest financial disruption in history affecting everyone and everything For over a century Alberta s massive carbon resources have supported Alberta and Canada financially helping make Canada the world s fifth largest oil and gas producer Carbon has been a major driver of prosperity employment and opportunity shaping the country we know today However climate change is creating enormous challenges for Alberta and Canada with no possible outcomes that will satisfy all stakeholders Alberta has become ground zero for the changes many demand but few are willing to pay for As the province demonstrates what carbon's future looks and feels like unless the rest of the world participates Alberta has become a needless sacrifice From Miracle to Menace explains how Alberta came to be the enormity of the planned financial dislocation and how Alberta and Canada can meet the climate challenge without committing economic suicide

The Digital Prism Mikkel Flyverbom, 2019-10-17 Shows how digital transformations and new visibilities shape how people live how organizations work and how societies and politics operate Whose Global Village? Ramesh Srinivasan, 2017-02-28 A call to action to include marginalized non western communities in the continuously expanding digital revolution In the digital age technology has shrunk the physical world into a global village where we all seem to be connected as an online

community as information travels to the farthest reaches of the planet with the click of a mouse Yet while we think of platforms such as Twitter and Facebook as open and accessible to all in reality these are commercial entities developed primarily by and for the Western world Considering how new technologies increasingly shape labor economics and politics these tools often reinforce the inequalities of globalization rarely reflecting the perspectives of those at the bottom of the digital divide This book asks us to re consider whose global village we are shaping with the digital technology revolution today Sharing stories of collaboration with Native Americans in California and New Mexico revolutionaries in Egypt communities in rural India and others across the world Ramesh Srinivasan urges us to re imagine what the Internet mobile phones or social media platforms may look like when considered from the perspective of diverse cultures Such collaborations can pave the way for a people first approach toward designing and working with new technology worldwide Whose Global Village seeks to inspire professionals activists and scholars alike to think about technology in a way that embraces the realities of communities too often relegated to the margins We can then start to visualize a world where technologies serve diverse communities rather than just the Western consumer Management in the Age of Digital Business Complexity Bill McKelvey, Renata Kaminska, Maria Paz Salmador, Nadine Escoffier, 2021-09-07 Management in the Age of Digital Business Complexity focuses on how the digital age is changing management and vastly speeding up complexity dynamics The recent coevolution of technologies has dramatically changed in just a few years how people and firms learn communicate and behave Consequently the process of how firms coevolve and the speed at which they coevolve has been dramatically changed in the digital age and managerial methods are lagging way behind Combining his own expertise with that of a number of specialist and international co authors McKelvey conveys how companies that fall behind digitally can guickly be driven out of business The book has been created for academics seeking to upgrade management thinking into the modern digital age and vastly improve the change capabilities of firms facing digital oriented competition Toward New Possibilities for Library and Information Science Scott Sikes, 2023-03-01 The 2018 West Virginia teachers strike in the USA exemplifies the changing shape of dissent and protest in the digital age The use of social media has changed the ways such events develop offering new tools for organizing strategizing generating large numbers of participants and for communicating crucial information
