

National Student Financial Aid Scheme (NSFAS)

NSFAS is a **government loan scheme**, with the added incentive of a bursary conversion (maximum of 40%) depending on academic performance.

- If you do well, 40% of this can be converted to a bursary!!
 - If you fail, you will have to pay back EVERYTHING!
-
- **Academically deserving and financially needy students** have the opportunity to apply for a loan from NSFAS, part of which can be converted to a bursary, subject to academic results.
 - Loans do not always cover tuition fees and other study costs in full. The amount of the loan is determined, among other things, by the family's financial need and the student's cost of study.
 - Application forms available online: www.nsfas.org.za

ETDP SETA Scarce & Critical Skills Guide 2010/11,

Discrimination in an Unequal World Miguel Angel Centeno, Katherine S. Newman, 2010-09 Is globalization making our world more equal or less Proponents of globalization argue that it is helping and that in a competitive world no one can afford to discriminate except on the basis of skills Opponents counter that globalization does nothing but provide a meritocratic patina on a consistently unequal distribution of opportunity Yet despite the often deafening volume of the debate there is surprisingly little empirical work available on the extent to which the process of globalization over the past quarter century has had any effect on discrimination Tackling this challenge Discrimination in an Unequal World explores the

relationship between discrimination and unequal outcomes in the appropriate geographical and historical context Noting how each society tends to see its particular version of discrimination as universal and obvious the editors expand their set of cases to include a broad variety of social relations and practices However since methods differ and are often designed for particular national circumstances they set the much more ambitious and practical goal of establishing a base with which different forms of discrimination across the world can be compared Derived from a broad array of methods the book draws many important lessons on the new means by which the world creates social hierarchies the democratization of inequality and the disappearance of traditional categories

Let's Talk About Varsity, 2009 *The Youth Dividend* Jan H. Hofmeyr, 2012 [Fees Must Fall](#) Susan Booysen, 2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution

This book maps the contours of student discontent a year after the start of the FeesMustFall revolt. Student voices dissect colonialism, improper compromises by the founders of democratic South Africa, feminism, worker rights, and meaningful education. In-depth assessments by prominent scholars reflect on the complexities of student activism, its impact on national and university governance, and offer provocative analyses of the power of the revolt.

Transforming Universities in South Africa, 2020-08-31 The idea of transformation in higher education underpins all policy documents, academic literature, and on-going debates in South Africa. *Transforming Universities in South Africa: Pathways to Higher Education Reform* responds to the pressing need to comprehensively review the post-apartheid experience and assess where South Africa's higher education stands across the continent and globally, particularly within the country's efforts to overcome decades of socio-economic imbalances. It addresses the question of whether South Africa's transformation strategy from apartheid to democracy was simply a symbolic new flag-raising and new anthem-singing exercise reflecting a transition akin to those limited decolonization projects elsewhere in the world, or whether something more fundamental was possible and was achieved, with political and policy implications for other countries in Africa and globally. This volume's ultimate purpose is to provide a basis for imagining new futures in which South Africa's higher education, in the context of Africa and the global world, takes centre stage.

Practical Wisdom and Resilience: Overcoming Downside Risk Kazuyo Hanai, Rangarirai Gavin Muchetu, Laban Kithinji Kinyua, Yoichi Mine, 2025-05-24 This book classifies and assesses the real and perceived risks associated with both the COVID-19 pandemic and government responses to it in seven African countries: DR Congo, Kenya, Ethiopia, South Africa, Tanzania, Uganda, and Zimbabwe, based on large-scale quantitative and qualitative surveys conducted in 2022-2024. It also elucidates the people's resilience in overcoming the risks within their political, social, and cultural context. Although research on COVID-19 has been conducted in various fields, particularly in the medical field, the analytical perspective of this book is unique. COVID-19 prevention policies are considered to have seriously increased other risks, such as hunger, other infectious diseases, interruption of education, and various types of human rights violations, including increased conflict, violence against civilians, and political abuse. Therefore, this book argues that COVID-19 prevention policies, as well as the pandemic itself, should be regarded as the downside risk that triggers the deterioration of the other potential risks to vulnerable people. Depicted here is the account of how trust in government, community, and family within the existing political, social, and cultural environment created pandemic politics, as elections during the pandemic were instrumentalized and politicized, government prevention measures threatened people's lives more than COVID-19 during lockdowns and severe behavioral restrictions, and the spread of misinformation discouraged people from being vaccinated. This book will be useful to policy makers and practitioners in international society who are preparing for the next pandemic, based on the lessons learned from the COVID-19 pandemic.
