Indecent Detroit Ben Strassfeld, 2023-12-05 While Detroit has been a major focus in urban history little has been written on censorship in the very city that due to shifting legalities the urban crisis and racial tensions profoundly shaped media suppression in the United States By examining censorship in film and literature Indecent Detroit recounts the evolution of media control from the end of WWII through the 1970s when the US saw a major change in the legal mechanisms used to censor media due to court rulings that curtailed censorship laws Ben Strassfeld reveals how Detroit altered its censorial tactics and rhetoric from an obscenity based system of censorship centered in the Detroit Police Department to a regulatory model based in zoning law that was then expanded nationwide This shift was connected to broader social and political trends including the sexual revolution that led the public to increasingly turn against censorship A must read for film and media scholars Indecent Detroit highlights how one Midwest city's ordinance was imitated across the country after it was upheld by the US Supreme Court making this more than a local curiosity but also an influential model for the cultural political and moral control of urban space through media regulation      Motor City Music Mark Slobin, 2018 Motor City Music is a pioneering study of the musical life of an American metropolis 1940s 60s Detroit produced prominent musicians from jazz to classical to ethnic Author Mark Slobin begins with a reflection on his life growing up in Detroit stresses public school music surveys neighborhood musical life and covers industry labor the counterculture media and the record industry including Motown

Lawrence, 2024-08-05 Manufacturing jobs once the backbone of the modern US economy have declined as a share of GDP over recent decades darkening opportunities for middle class advancement Similar

trends have impacted export superpowers like China Germany Japan Singapore and South Korea Driven by nostalgia for a bygone era however many countries have turned to reshoring and industrial policies to revive manufacturing employment In Behind the Curve Can Manufacturing Still Provide Inclusive Growth Robert Z Lawrence argues that these efforts are unlikely to succeed He demonstrates that deeply rooted forces common to all countries technological change shifting consumer spending patterns and trade account for lagging manufacturing employment and that these trends are unlikely to be reversed The industrial sector s historic role as an engine of opportunity and inclusive growth is unsustainable Government efforts to promote manufacturing to achieve goals such as industrial self sufficiency green transitions and digital technologies however well intentioned may even make economic growth less inclusive Instead new policies are needed to help people places and countries cope with inevitable changes in the composition of employment

Cialdella,2020-03-03 *Motor City Green* is a history of green spaces in metropolitan Detroit from the late nineteenth to the early twenty first century The book focuses primarily on the history of gardens and parks in the city of Detroit and its suburbs in southeast Michigan Cialdella argues that Detroit residents used green space to address problems created by the city s industrial rise and decline and racial segregation and economic inequality As the city s social landscape became increasingly uncontrollable Detroiters turned to parks gardens yards and other outdoor spaces to relieve the negative social and environmental consequences of industrial capitalism *Motor City Green* looks to the past to demonstrate how today s urban gardens in Detroit evolved from but are also distinct from other urban gardens and green spaces in the city s past

Written in a non technical narrative style this book is an invaluable resource for anyone concerned with current trends in urban development During the Reagan era responsibility for urban planning and development was transferred from government to private business This private sector hegemony over urban development differs markedly from the liberal policy initiatives of the 1960s and 1970s Through a series of case studies this book examines these shifting trends and shows that private sector efforts to revitalize America s central cities have not been uniformly successful The contributors who are among America s leading social scientists utilize neo Marxist urban theory to explain the conditions under which private initiative enhances or erodes downtown redevelopment
