The Onlife Manifesto Being Human In A Hyperconnected Era

Javier Gimeno-Martínez

The Onlife Manifesto Being Human In A Hyperconnected Era:

The Onlife Manifesto Luciano Floridi, 2014-11-16 What is the impact of information and communication technologies ICTs on the human condition In order to address this question in 2012 the European Commission organized a research project entitled The Onlife Initiative concept reengineering for rethinking societal concerns in the digital transition This volume collects the work of the Onlife Initiative It explores how the development and widespread use of ICTs have a radical impact on the human condition ICTs are not mere tools but rather social forces that are increasingly affecting our self conception who we are our mutual interactions how we socialise our conception of reality our metaphysics and our interactions with reality our agency In each case ICTs have a huge ethical legal and political significance yet one with which we have begun to come to terms only recently The impact exercised by ICTs is due to at least four major transformations the blurring of the distinction between reality and virtuality the blurring of the distinction between human machine and nature the reversal from information scarcity to information abundance and the shift from the primacy of stand alone things properties and binary relations to the primacy of interactions processes and networks Such transformations are testing the foundations of our conceptual frameworks Our current conceptual toolbox is no longer fitted to address new ICT related challenges This is not only a problem in itself It is also a risk because the lack of a clear understanding of our present time may easily lead to negative projections about the future The goal of The Manifesto and of the whole book that contextualises is therefore that of contributing to the update of our philosophy It is a constructive goal The book is meant to be a positive contribution to rethinking the philosophy on which policies are built in a hyperconnected world so that we may have a better chance of understanding our ICT related problems and solving them satisfactorily The Manifesto launches an open debate on the impacts of ICTs on public spaces politics and societal expectations toward policymaking in the Digital Agenda for Europe s remit More broadly it helps start a reflection on the way in which a hyperconnected world calls for rethinking the referential frameworks on which policies are built *The Onlife Manifesto* Luciano Floridi, 2014-12-31

Hyperconnectivity and Digital Reality Kathrin Otrell-Cass, 2019-08-23 This book addresses the topic of hyperconnectivity by building on expanding and critically examining issues that have to do with information communication technology ICT and networked societies The book explores questions relating to attention and consciousness techno capitalism and communicative action taking Adopting different philosophical angles to assess the challenges we face due to our entanglement with hyperconnected technologies the book studies performance and performativity in a digitised world by considering the unfolding of our onlife and by looking at what this means to educated future scientists and engineers in a hyperconnected world The book further discusses digital activities as the new constructs of ourselves and poses questions about how much literacy is needed for us not to be enslaved by those constructs The book also explores the challenges of hyperconnectivity and the health sector to showcase the vulnerabilities we are increasingly exposed to It makes clear that

since the boundaries between on and offline are becoming increasingly blurred we will require new flexible frameworks that reconsider what it means to be human in a hyperconnected world

Cultural Heritage in a Changing World Karol Jan Borowiecki, Neil Forbes, Antonella Fresa, 2016-05-02 The central purpose of this collection of essays is to make a creative addition to the debates surrounding the cultural heritage domain In the 21st century the world faces epochal changes which affect every part of society including the arenas in which cultural heritage is made held collected curated exhibited or simply exists The book is about these changes about the decentring of culture and cultural heritage away from institutional structures towards the individual about the questions which the advent of digital technologies is demanding that we ask and answer in relation to how we understand collect and make available Europe's cultural heritage Cultural heritage has enormous potential in terms of its contribution to improving the quality of life for people understanding the past assisting territorial cohesion driving economic growth opening up employment opportunities and supporting wider developments such as improvements in education and in artistic careers Given that spectrum of possible benefits to society the range of studies that follow here are intended to be a resource and stimulus to help inform not just professionals in the sector but all those with an interest in cultural heritage

Subjectivity Transformed Thomas Vesting, 2023-11-28 This book provides a historically informed reconstruction of the social practices that have shaped the formation of the modern subject from the early modern period to the present The formal legal protections accorded to subjects are and always have been latent in social practices norms and language before they are articulated in formal legal orders Vesting argues that in Western societies legal personhood is closely tied to three ideal types of social personhood what he calls the gentleman the manager and Homo digitalis By examining these three ideal types and their emergence in society we can see that Western formal law does not bring these ideal types into being but on the contrary they arise from the social and cultural conditions that they generate and reflect Correspondingly Western legal personhood or legal subjectivity arises from the history and culture of Western nations not the other way around Therefore signature features of Western formal law particularly its valorization of the rights of persons whether natural or nonnatural come from the particular sociohistorical cultural developments that had already generated the strong ideas of social personhood inherent in the ideal types of the gentleman the manager and Homo digitalis Subjectivity Transformed is a major contribution to legal and social theory and with its original analysis of the formation of modern subjectivity it will be of interest to students and scholars throughout the social sciences and humanities

Philosophy and Computing Thomas M. Powers, 2017-10-26 This book features papers from CEPE IACAP 2015 a joint international conference focused on the philosophy of computing Inside readers will discover essays that explore current issues in epistemology philosophy of mind logic and philosophy of science from the lens of computation Coverage also examines applied issues related to ethical social and political interest The contributors first explore how computation has changed philosophical inquiry Computers are now capable of joining humans in exploring foundational issues Thus we can

ponder machine generated explanation thought agency and other quite fascinating concepts The papers are also concerned with normative aspects of the computer and information technology revolution They examine technology specific analyses of key challenges from Big Data to autonomous robots to expert systems for infrastructure control and financial services The virtue of a collection that ranges over philosophical questions such as this one does lies in the prospects for a more integrated understanding of issues These are early days in the partnership between philosophy and information technology Philosophers and researchers are still sorting out many foundational issues They will need to deploy all of the tools of philosophy to establish this foundation This volume admirably showcases those tools in the hands of some excellent scholars

Postdigital Humans Maggi Savin-Baden, 2021-04-25 This book explores approaches to developing and using postdigital humans and the impact they are having on a postdigital world It presents current research and practices at a time when education is changing rapidly with digital technological advances In particular it outlines the major challenges faced by today's employers developers teachers researchers priests and philosophers The book examines conceptions of postdigital humans and studies the issue in connection with ethics and employment as well as from perspectives such as philosophy and religion

Constitutional Challenges in the Algorithmic Society Hans-W. Micklitz, Oreste Pollicino, Amnon Reichman, Andrea Simoncini, Giovanni Sartor, Giovanni De Gregorio, 2021-12-02 How can the law address the constitutional challenges of the algorithmic society This volume provides possible solutions Rethinking Law and Language Jan M. Broekman, 2019 The law language law theme is deeply engraved in Occidental culture more so than contemporary studies on the subject currently illustrate This insightful book creates awareness of these cultural roots and shows how language and themes in law can be richer than studying a simple mutuality of motives Rethinking Law and Language unveils today's problems with the two faces of language the analogue and the digital on the basis of which our smart phones and Artificial Intelligence create modern life

Design History and Culture Javier Gimeno-Martínez, 2024-07-26 This student friendly text provides a comprehensive exploration of the methods and approaches employed within design scholarship drawing upon influences from history art history anthropology and interdisciplinary studies such as science and technology studies and material culture studies Drawing connections between these methods and the evolving landscape of design the book expands design culture beyond traditional outcomes to encompass areas like design for social innovation digital design critical design design anthropology and craftivism Additionally the book introduces novel theoretical frameworks to facilitate discussions on contemporary designers work including new materialism object oriented ontology and decolonization This comprehensive overview of methods and approaches will enable students to select the most appropriate methodological tools for their own research It is an ideal guide for both undergraduate and postgraduate students in design design culture design history design studies and visual culture

Data Cultures in Higher Education Juliana E. Raffaghelli, Albert Sangrà, 2023-03-07 This collection focuses on the role of higher education institutions concerning datafication as a complex phenomenon It explores how the

universities can develop data literacies shaping tomorrow skills and *formae mentis* to face the most deleterious effects of datafication but also to engage in creative and constructive ways with data. Notably the book spots data practices within the two most relevant sides of academics professional practice namely research and teaching. Hence the collection seeks to reflect on faculty's professional learning about data infrastructures and practices. The book draws on a range of studies covering the higher education response to the several facets of data in society from data surveillance and the algorithmic control of human behaviour to empowerment through the use of open data. The research reported ranges from literature overviews to multi case and in depth case studies illustrating institutional and educational responses to different problems connected to data. The ultimate intention is to provide conceptual bases and practical examples relating to universities faculty development policies to overcome data practices and discourses fragmentation and contradictions in a nutshell to build fair data cultures in higher education.

Privacy and Identity Management. The Smart Revolution Marit Hansen, Eleni Kosta, Igor Nai-Fovino, Simone Fischer-Hübner, 2018-06-08. This book contains selected papers presented at the 12th IFIP WG 9.2.9.5.9.6.11.7.11.6 SIG 9.2.2 International Summer School on Privacy and Identity Management held in Ispra Italy in September 2017. The 12 revised full papers, 5 invited papers and 4 workshop papers included in this volume were carefully selected from a total of 48 submissions and were subject to a three phase review process. The papers combine interdisciplinary approaches to bring together a host of perspectives technical legal regulatory socio economic social societal political ethical anthropological philosophical and psychological. They are organized in the following topical sections: privacy engineering; privacy in the era of the smart revolution; improving privacy and security in the era of smart environments; safeguarding personal data and mitigating risks; assistive robots and mobility and privacy.

[Research Handbook on Big Data Law](#) Roland Vogl, 2021-05-28. This state of the art Research Handbook provides an overview of research into and the scope of current thinking in the field of big data analytics and the law. It contains a wealth of information to survey the issues surrounding big data analytics in legal settings as well as legal issues concerning the application of big data techniques in different domains.

Encyclopedia of Data Science and Machine Learning Wang, John, 2023-01-20. Big data and machine learning are driving the Fourth Industrial Revolution. With the age of big data upon us, we risk drowning in a flood of digital data. Big data has now become a critical part of both the business world and daily life as the synthesis and synergy of machine learning and big data has enormous potential. Big data and machine learning are projected to not only maximize citizen wealth but also promote societal health. As big data continues to evolve and the demand for professionals in the field increases, access to the most current information about the concepts, issues, trends and technologies in this interdisciplinary area is needed. The Encyclopedia of Data Science and Machine Learning examines current state of the art research in the areas of data science, machine learning, data mining and more. It provides an international forum for experts within these fields to advance the knowledge and practice in all facets of big data and machine learning, emphasizing emerging theories, principals, models

processes and applications to inspire and circulate innovative findings into research business and communities Covering topics such as benefit management recommendation system analysis and global software development this expansive reference provides a dynamic resource for data scientists data analysts computer scientists technical managers corporate executives students and educators of higher education government officials researchers and academicians The Mind-Technology Problem Robert W. Clowes, Klaus Gärtner, Inês Hipólito, 2021-09-28 This edited book deepens the engagement between 21st century philosophy of mind and the emerging technologies which are transforming our environment Many new technologies appear to have important implications for the human mind the nature of our cognition our sense of identity and even perhaps what we think human beings are They prompt questions such as Would an uploaded mind be me Does our reliance on smart phones or wearable gadgets enhance or diminish the human mind and How does our deep reliance upon ambient artificial intelligence change the shape of the human mind Readers will discover the best philosophical analysis of what current and near future 21st technology means for the metaphysics of mind Important questions are addressed on matters relating to the extended mind and the distributed self Expert authors explore the role that the ubiquitous smart phone might have in creating new forms of self knowledge They consider machine consciousness brain enhancement and smart ambient technology and what they can tell us about phenomenal consciousness While ideas of artificial general intelligence cognitive enhancements and the smart environment are widely commented on serious analysis of their philosophical implications is only getting started These contributions from top scholars are therefore very timely and are of particular relevance to students and scholars of the philosophy of mind philosophy of technology computer science and psychology The 2021 Yearbook of the Digital Ethics Lab Jakob Mökander, Marta Ziosi, 2022-11-07 This annual edited volume explores a wide range of topics in digital ethics and governance Included are chapters that analyze the opportunities and ethical challenges posed by digital innovation delineate new approaches to solve them and offer concrete guidance on how to govern emerging technologies The contributors are all members of the Digital Ethics Lab the DELab at the Oxford Internet Institute a research environment that draws on a wide range of academic traditions Collectively the chapters of this book illustrate how the field of digital ethics whether understood as an academic discipline or an area of practice is undergoing a process of maturation Most importantly the focus of the discourse concerning how to design and use digital technologies is increasingly shifting from soft ethics to hard governance Then there is the trend in the ongoing shift from what to how whereby abstract or ad hoc approaches to AI governance are giving way to more concrete and systematic solutions The maturation of the field of digital ethics has as this book attempts to show been both accelerated and illustrated by a series of recent events This text thereby takes an important step towards defining and implementing feasible and effective approaches to digital governance It appeals to students researchers and professionals in the field

Responsibility and Resistance Tobias Eberwein, Matthias Karmasin, Friedrich Krotz, Matthias Rath, 2019-08-05 The

volume deals with the normative challenges and the ethical questions imposed by and through the developments and changes in everyday life culture and society in the context of media change. It is thus concerned with the questions of whether and how the central concept of enlightened ethics must evolve under these premises or in other words what form do ethics take in mediatized societies. In order to address this question and to stimulate and initiate a debate the authors focus on two concepts: responsibility and resistance. Their contributions try to shed light not only on the empirical shreds of evidence of change in mediatized societies but also on the normative challenges and ethical possibilities of these developments.

Blockchain and Legitimacy Akanksha Bisoyi, 2025-09-18. This book provides an in-depth perspective on a key question regarding the design and deployment of blockchain technology: can the rule of law legitimately be applied to shape and guide the design and implementation of blockchain technology? Various concepts from the philosophy of technology and design theory are discussed to address this question, especially those concerning inscription, affordance, and technological intervention and mediation. Given that blockchain influences the traditional social order and that its deployment challenges the fundamental tenets of the rule of law, this book explores various attributes of blockchain technology that may result in crypto legalism, which is irreconcilable with the rule of law and typically portrays a sort of unthinking of the rigid adherence to the rule of code that is imposed on users. While Part I of the book covers the relationship between blockchain and the rule of law, Part II deals with normative foundations of design in blockchain artifacts, crypto legalism, and legitimacy standards for blockchain. Part III focuses on how the rule of law principles can be embedded into blockchain design and implementation, analyzing the implications of design choices, state involvement, and the potential for legal affordances within blockchain systems. In this book, the author adopts the rule of law by design approach to understand the influences and aspirations behind programming the previously discussed concepts and incorporating the rule of law standards into artifacts as a means of addressing and reducing the illegitimacies associated with the rule of code embedded in blockchain. Accordingly, the book offers a valuable resource for researchers and academics in the fields of law and technology, offering a nuanced approach to bridging the gap between legal theory and technological implementation. Additionally, it provides a practical framework for technologists and policymakers, helping them evaluate and guide developments in blockchain.

Handbook of Research on Humanizing the Distance Learning Experience Northcote, Maria, Gosselin, Kevin P., 2016-11-08. Distance learning is becoming increasingly prevalent in educational settings around the world as it provides more flexibility and access to classes for students and educators alike. While online classrooms are proving to be popular, there is a significant gap in the personalization and humanization of these courses. The *Handbook of Research on Humanizing the Distance Learning Experience* features empirical research on promoting the personalization of online learning courses through presence, emotionality, and interactivity within digital classrooms. Highlighting best practices and evaluating student perceptions on distance learning, this handbook will appeal to researchers, educators, course designers, professionals, and administrators.

Ethics, Law and the Politics of Information Massimo Durante, 2017-08-03 This book provides a detailed discussion of the theoretical and practical implications of the change driven by ICTs. Such a change is often much more profound than an emphasis on information technology and society can capture for not only does it bring about ethical and policy vacuums that call for a new understanding of ethics, politics and law but it also re-ontologizes reality as propounded by Luciano Floridi's philosophy and ethics of information. The informational turn is transforming our understanding of reality by challenging the conventional ways we have of thinking about our world and our identities in terms of stable and enduring structures and beliefs. The information age we inhabit brings to completion our self-understanding as informational systems that produce, process and exchange information with other informational systems in an environment that is itself made up of information. The present volume provides us with a better understanding of the normative nature and role of information helping us to grasp the sense and extent to which informational resources serve as constraining affordances guiding our behaviours. It does so by delineating the background against which we build our beliefs about reality, make decisions and behave through our interactions with a multi-agent system that is increasingly dependent on ICTs. The book will be of interest to a vast audience ranging from information technologists, ethicists, policy makers, social and legal scholars and all those willing to embrace the following three tenets: we construct our world and ourselves informationally by constructing our world and ourselves; we thereby become aware of our limits; it is precisely these limits that make us become human beings.

The Top Books of the Year The Onlife Manifesto Being Human In A Hyperconnected Era The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the captivating narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.

The Onlife Manifesto Being Human In A Hyperconnected Era Introduction

In today's digital age, the availability of The Onlife Manifesto Being Human In A Hyperconnected Era books and manuals for download has revolutionized the way we access information. Gone are the days of physically flipping through pages and carrying heavy textbooks or manuals. With just a few clicks, we can now access a wealth of knowledge from the comfort of our own homes or on the go. This article will explore the advantages of The Onlife Manifesto Being Human In A Hyperconnected Era books and manuals for download, along with some popular platforms that offer these resources. One of the significant advantages of The Onlife Manifesto Being Human In A Hyperconnected Era books and manuals for download

is the cost-saving aspect. Traditional books and manuals can be costly, especially if you need to purchase several of them for educational or professional purposes. By accessing The Onlife Manifesto Being Human In A Hyperconnected Era versions, you eliminate the need to spend money on physical copies. This not only saves you money but also reduces the environmental impact associated with book production and transportation. Furthermore, The Onlife Manifesto Being Human In A Hyperconnected Era books and manuals for download are incredibly convenient. With just a computer or smartphone and an internet connection, you can access a vast library of resources on any subject imaginable. Whether you're a student looking for textbooks, a professional seeking industry-specific manuals, or someone interested in self-improvement, these digital resources provide an efficient and accessible means of acquiring knowledge. Moreover, PDF books and manuals offer a range of benefits compared to other digital formats. PDF files are designed to retain their formatting regardless of the device used to open them. This ensures that the content appears exactly as intended by the author, with no loss of formatting or missing graphics. Additionally, PDF files can be easily annotated, bookmarked, and searched for specific terms, making them highly practical for studying or referencing. When it comes to accessing The Onlife Manifesto Being Human In A Hyperconnected Era books and manuals, several platforms offer an extensive collection of resources. One such platform is Project Gutenberg, a nonprofit organization that provides over 60,000 free eBooks. These books are primarily in the public domain, meaning they can be freely distributed and downloaded. Project Gutenberg offers a wide range of classic literature, making it an excellent resource for literature enthusiasts. Another popular platform for The Onlife Manifesto Being Human In A Hyperconnected Era books and manuals is Open Library. Open Library is an initiative of the Internet Archive, a non-profit organization dedicated to digitizing cultural artifacts and making them accessible to the public. Open Library hosts millions of books, including both public domain works and contemporary titles. It also allows users to borrow digital copies of certain books for a limited period, similar to a library lending system. Additionally, many universities and educational institutions have their own digital libraries that provide free access to PDF books and manuals. These libraries often offer academic texts, research papers, and technical manuals, making them invaluable resources for students and researchers. Some notable examples include MIT OpenCourseWare, which offers free access to course materials from the Massachusetts Institute of Technology, and the Digital Public Library of America, which provides a vast collection of digitized books and historical documents. In conclusion, The Onlife Manifesto Being Human In A Hyperconnected Era books and manuals for download have transformed the way we access information. They provide a cost-effective and convenient means of acquiring knowledge, offering the ability to access a vast library of resources at our fingertips. With platforms like Project Gutenberg, Open Library, and various digital libraries offered by educational institutions, we have access to an ever-expanding collection of books and manuals. Whether for educational, professional, or personal purposes, these digital resources serve as valuable tools for continuous learning and self-improvement. So why not take advantage of the vast world of The Onlife Manifesto

Being Human In A Hyperconnected Era books and manuals for download and embark on your journey of knowledge?

FAQs About The Onlife Manifesto Being Human In A Hyperconnected Era Books

1. Where can I buy The Onlife Manifesto Being Human In A Hyperconnected Era books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a The Onlife Manifesto Being Human In A Hyperconnected Era book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of The Onlife Manifesto Being Human In A Hyperconnected Era books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are The Onlife Manifesto Being Human In A Hyperconnected Era audiobooks, and where can I find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.
8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.

10. Can I read The Onlife Manifesto Being Human In A Hyperconnected Era books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
