Inborn errors of Carbohydrate Metabolism Ivan Martinez Duncker, Ida Vanessa Doederlein Schwartz, Jose Elias Garcia-Ortiz, Melania Abreu-González, 2024-07-03 Inborn errors of carbohydrate metabolism are a heterogeneous subgroup of inborn errors that are caused by mutations in human genes coding for proteins involved in carbohydrate catabolic and anabolic pathways Through the breakdown of sugars carbohydrate catabolism allows a constant supply of energy e.g. glycolysis but also involves the breakdown of the cell's complex oligosaccharides e.g. lysosomal degradation of surface glycoconjugates allowing the recycling of monosaccharides On the other hand anabolism of carbohydrates e.g. gluconeogenesis is required to supply newly synthesized sugars to catabolic pathways also allowing interconversion of sugars and sustaining the synthetic pathways of complex carbohydrate structures such as glycosaminoglycans and glycans that are the carbohydrate moiety of glycoconjugates involved in multiple biological functions

The Northern Cheyenne Exodus in History and Memory Ramon Powers, James N. Leiker, 2012-09-13 The exodus of the Northern Cheyennes in 1878 and 1879 an attempt to flee from Indian Territory to their Montana homeland is an important event in American Indian history It is equally important in the history of towns like Oberlin Kansas where Cheyenne warriors killed more than forty settlers The Cheyennes in turn suffered losses through violent encounters with the U S Army More than a century later the story remains familiar because it has been told by historians and novelists and on film In *The Northern Cheyenne Exodus in History and Memory* James N Leiker and Ramon Powers explore how the event has been remembered told and retold They examine the recollections of Indians and settlers and their descendants and they consider local history mass media treatments and literature to draw thought provoking conclusions about how this story has changed over time The Cheyennes journey has always been recounted in melodramatic stereotypes and for the last fifty years most versions have featured noble savages trying to reclaim their birthright Here Leiker and Powers deconstruct those stereotypes and transcend them pointing out that history is never so simple The Cheyennes flight they write had left white and Indian bones alike scattered along its route from Oklahoma to Montana In this view the descendants of the Cheyennes and the settlers they encountered are all westerners who need history as a way of explaining the bones and arrowheads that littered the plains Leiker and Powers depict a rural West whose diverse peoples Euro American and Native American alike seek to preserve their heritage through memory and history Anyone who lives in the contemporary Great Plains or who wants to understand the West as a whole will find this book compelling
