The Handbook of Negotiation and Culture Michele J. Gelfand, Jeanne M. Brett, 2004. In the global marketplace, negotiation frequently takes place across cultural boundaries, yet negotiation theory has traditionally been grounded in Western culture. This book, which provides an in-depth review of the field of negotiation theory, expands current thinking to include cross-cultural perspectives. The contents of the book reflect the diversity of negotiation research: negotiator cognition, motivation, emotion, communication, power, and disputing; intergroup relationships; third parties; justice; technology; and social dilemmas, and provides new insight into negotiation theory, questioning assumptions, expanding constructs, and identifying limits not apparent from working exclusively within one culture. The book is organized in three sections and pairs chapters on negotiation theory with chapters on culture. The first part emphasizes psychological processes: cognition, motivation, and emotion. Part II examines the negotiation process. The third part emphasizes the social context of negotiation. A final chapter synthesizes the main themes of the book to illustrate how scholars and practitioners can capitalize on the synergy between culture and negotiation research.

The Realizations of the Self Andrea Altobrando, Takuya Niikawa, Richard Stone, 2018-09-11. Recent discussions of self-realization have devolved into unscientific theories of self-help. However, this vague and often misused concept is connected to many important individual and social problems. As long as its meaning remains unclear, it can be abused for social, political, and commercial malpractices. To combat this issue, this book shares perspectives from scholars of various philosophical traditions. Each chapter takes new steps in asking what the meaning of self-realization is, both in terms of what it means to understand who or what one is, and also in terms of how one can or should fulfill oneself. The conceptual elucidations achieved from both theoretical and practical perspectives allow for a more mature awareness of how to deal with discourses on self-realization and, in any case, can help to demystify the subject.
