backgrounds **CyberLit** Marilyn Dover Newman, 2004 Elementary school media specialists and teachers routinely use children's picture books in their lessons. These books add depth and vitality to the curriculum because they are written and illustrated by some of the world's most gifted writers and artists. Yet educators are finding it increasingly harder to insert this pleasant and important activity into the busy school day due to increased pressures to improve test scores, to implement a standards-driven curriculum, and to stay abreast of new technologies to deliver instruction. This book helps educators continue to incorporate literature into the school day in spite of these obstacles. **CyberLit** is a book for those who work with or teach others who work with children in the primary grades. It is for those who use trade books to supplement and enhance health, science, creative writing, history, geography, reading, math, language arts, character education, multicultural studies, holidays, citizenship, and the fine arts. It is for those who love children's literature and book illustration. With this book, you no longer need to get lost in cyberspace. The information has already been searched, collected, assessed, and compiled. Easily accessible and at your fingertips, this directory can help you to get biographical information about authors and illustrators and to learn how they get ideas for stories, how illustrations are created, how to extend the books into the curriculum, and where to find time-saving lesson plans and book-related activities for classroom projects and units. These outstanding websites of children's authors, illustrators, and storybook characters were selected based on their educational value and for the fact that they contain a minimum of commercialization. They are exemplary examples of authors, publishers, and scholars who understand and acknowledge the roles of teachers and librarians. Like little gems in cyberspace, they go beyond the ordinary content for busy educators.

Pedagogy in a New Tonality Peter Gouzouasis,2012-01-01 This is a book for teachers by teachers from elementary school to university level classrooms It is about the use of creative instructional strategies in K 12 classroom settings and the transformations the teachers made in their journeys from being traditional practitioners to becoming pedagogical in their approaches to teaching and learning across the curriculum Over twenty teachers conducted research in their classrooms on the implementation of creative strategies tactics graphics organizers and visual journals in teaching and learning They have written their inquiries in a narrative style informed by various forms of arts based educational research Their research is approachable and usable by other teachers who are interested in becoming reflective reflexive practitioners Many of the strategies tactics and graphics organizers are described by Barrie Bennett in his widely used textbook Beyond Monet The Artful Science of Instructional Intelligence However through their journeys of becoming teacher learner researchers many

discovered numerous creative variations of Bennett's work as it was implemented in their classrooms. While there are many professional books that provide ideas on collaborative learning and creative teaching approaches, there is very little published research on the efficacy of these concepts in the K-12 classroom. These inquiries provide practical insights into how inspired teachers can conduct research on improving their own practice as well as on greatly improving their students' learning. Thus, this book has widespread interest for teachers and administrators who seek to implement systemic changes in the ways that teachers teach and children learn in the 21st century.

An Introduction to Diverse Literacies in Primary Classrooms Karen Daniels, Marie Helks, 2025-04-09. How can teachers be prepared to support all children in becoming literate? How can teachers best mediate the technical aspects of literacy and make these meaningful and relevant to their children? What kinds of pedagogical practices can enable children to become creative and critical users and producers of digital and non-digital texts? *An Introduction to Diverse Literacies in Primary Classrooms* brings together the voices of academics, classroom teachers, student teachers, and children to answer these questions. Research into children's literate lives illustrates that literacy is very much integrated into children's ongoing home, community, and school experiences, and these rich and diverse literate lives are very often digitally mediated. This essential and practical book explores key themes in literacy education, such as diversity, drama, literacy, and play, reader response, grammar, and children's authorship, to understand the interrelationship between children's diverse literacy practices and ways that these can be mediated within the English school curriculum. Written by a team of outstanding ITE English tutors and esteemed literacy researchers, this book is an essential reference for all student and practising teachers and a must-read for literacy coordinators and those interested in literacy research.
