The Notebooks of Leonardo Da Vinci Leonardo Vinci, 2014-09-14 More than fifteen hundred extracts containing the Renaissance genius maxims prophecies fables letters and brilliant observations in architecture painting physiology geography and other fields *Leonardo on Art and the Artist* Leonardo da Vinci, 2012-08-08 Systematic grouped passages of Leonardo s writings concerning painting focusing on problems of interpretation More than an anthology it offers a reconstruction of the underlying meaning of Leonardo s words Introductions notes bibliography reference materials Over 125 black and white illustrations **The Notebooks of Leonardo Da Vinci** Leonardo Da Vinci, 2019-12-20 This new Great collection of his art and notes from Cheapest Books Put together all notes and drawings of Da Vinci as found not need reordered A singular fatality has ruled the destiny of nearly all the MOST FAMOUS OF LEONARDO DA VINCI S WORKS Two of the three most important were never completed obstacles having arisen during his life time which obliged him to leave them unfinished namely the Sforza Monument and the Wall painting of the Battle of Anghiari while the third the picture of the Last Supper at Milan has suffered irremediable injury from decay and the repeated restorations to which it was recklessly subjected during the XVIIth and XVIIIth centuries Nevertheless no other picture of the Renaissance has become so wellknown and popular through copies of every description Vasari says and rightly in his Life of Leonardo that he laboured much more by his word than in fact or by deed and the biographer evidently had in his mind the numerous works in Manuscript which have been preserved to this day To us now it seems almost inexplicable that these valuable and interesting original texts should have remained so long unpublished and indeed forgotten It is certain that during the XVIth and XVIIth centuries their exceptional value was highly appreciated This is proved not merely by the prices which they commanded but also by the exceptional interest which has been attached to the change of ownership of merely a few pages of Manuscript Leonardos literary labours in various departments both of Art and of Science were those essentially of an enquirer hence the analytical method is that which he employs in arguing out his investigations and dissertations The vast structure of his scientific theories is consequently built up of numerous separate researches and it is much to be lamented that he should never have collated and arranged them His love for detailed research as it seems to me was the reason that in almost all the Manuscripts the different paragraphs appear to us to be in utter confusion on one and the same page observations on the most dissimilar subjects follow each other without any connection A page for instance will begin with some principles of astronomy or the motion of the earth then come the laws of sound and finally some precepts as to colour Another page will begin with his investigations on the structure of the intestines and end with philosophical remarks as to the relations of poetry to painting and so forth Leonardo himself lamented this confusion and for that reason I do not think that the publication of the texts in the order in which they occur in the originals would at all fulfil his intentions No reader could find his way through such a labyrinth Leonardo himself could not have done it Added to this more than half of the five thousand

manuscript pages which now remain to us are written on loose leaves and at present arranged in a manner which has no justification beyond the fancy of the collector who first brought them together to make volumes of more or less extent Nay even in the volumes the pages of which were numbered by Leonardo himself their order so far as the connection of the texts was concerned was obviously a matter of indifference to him The only point he seems to have kept in view when first writing down his notes was that each observation should be complete to the end on the page on which it was begun

Modern Drug use R.D. Mann, 2012-12-06 Aureolus Theophrastus Bombastus von Hohenheim 1493-1541 commonly called Paracelsus was both one of the most original medical thinkers of the sixteenth century and was the man who made opium as laudanum arsenic copper sulphate iron lead mercury potassium sulphate and sulphur part of the pharmacopoeia A man of many parts but a pioneer chemist Paracelsus can be regarded as the originator of a body of work which was the precursor of chemical pharmacology and therapeutics To no small extent he stands therefore as a father figure of the modern pharmaceutical industry Today's physician who wants to look at that industry since the days of Paracelsus and weigh the great gains against the problems soon encounters difficulties To diminish them this Enquiry approaches its subject from historical principles This gives increased perspective to questions asked late in the book these questions being prompted by medical practice outside the industry and some twenty years of drug development activity within it In antiquity medicines often seem to have been used as part of magic and primitive man thought disease to be due to supernatural forces which he could influence The legacy remains and in trying to sort out what is rational in our use of drugs today we have to separate our small bits of science from the ancient magic and from modern commercial pressures and conditioning

[The Fabrication of Leonardo da Vinci's Trattato della pittura \(2 vols.\)](#) Claire

Farago, Janis Bell, Carlo Vecce, 2018-01-29 The basis for our understanding of Leonardo's theory of art was for over 150 years his *Treatise on Painting* which was issued in 1651 in Italian and French. This present volume offers both the first scholarly edition of the Italian *editio princeps* as well as the first complete English translation of this seminal work. In addition, it provides a comprehensive study of the Italian first edition, documenting how each editorial campaign that led to it produced a different understanding of the artist's theory. What emerges is a rich cultural and textual history that foregrounds the transmission of artisanal knowledge from Leonardo's workshop in the Duchy of Milan to Carlo Borromeo's Milan, Cosimo I de' Medici's Florence, Urban VIII's Rome, and Louis XIV's Paris.
