Questions H. Hiz, 2012-12-06 To the philosopher the logician and the linguist questions have a special fascination The two main views of language that it describes the world and that it expresses thought are not directly applicable to questions Questions are not assertions A question may be apt sharp to the point important or it may be inappropriate ambiguous awkward irrelevant or irreverent But it cannot be true or false It does not have a truth value not just because an utterance like Was the letter long does not indicate which letter is being talked about The indicative The letter was not long has the same indeterminacy In actual context the anaphoric definite article will be resolved both for a question and for an indicative sentence Contextual resolutions are easily found for most cross references A question cannot be either true or it does not describe a state of affairs Neither does it express false because thought because it is an expression of suspended thought of lack of judgment To dress it in other philosophical styles a question is not a judgment it is not a proposition it is not an assertion A philosopher may try to paraphrase a question as an indicative sentence for instance as a statement of ignorance or as a statement of the desire to know Hintikka Wachowicz and Lang explore this territory Or he may interpret it as a meta statement intimating the direction in which the flow of the discourse is going

The Book of Answers Tanya Stivers, 2022 Imagine for a moment the only way to confirm a yes no question was by saying Yeah How different would this make our communication Relying on a large corpus of naturally occurring recordings of spontaneous social interaction this book explores all of the ways that we confirm questions in our everyday social lives Tanya Stivers analyzes what these different ways of responding allow us to do that is

unique to each answer type When do we answer with Yeah rather than He is for instance or when do we use more complicated forms of confirming This information provides us with the basic response possibility space From that point we can examine what the range of responses in particular answers tells us about what is important to us in managing social relationships through social interaction The book explains that we can conceptualize the response possibility space as having three dimensions alignment autonomy and affiliation Speakers rely on the details of their response to position themselves at a particular point in that three dimensional space sometimes accepting trade offs among the dimensions to achieve a stance that is higher in alignment and autonomy and lower in affiliation or higher in affiliation and autonomy but lower in alignment The Book of Answers uses real life conversations to find hidden patterns in how we do things together such as reach decisions tell stories or arrive at agreement or disagreement Delving into the science of how we talk this book investigates what those patterns tell us about human communication and our social lives
