Brookes, Andres M. Perez, 2021-08-09 **Urban China** The World Bank; Development Research Center of the State Council, 2014-07-29 In the last 30 years China s record economic growth lifted half a billion people out of poverty with rapid urbanization providing abundant labor cheap land and good infrastructure While China has avoided some of the common ills of urbanization strains are showing as inefficient land development leads to urban sprawl and ghost towns pollution threatens people s health and farmland and water resources are becoming scarce With China s urban population projected to rise to about one billion or close to 70 percent of the country s population by 2030 China s leaders are seeking a more coordinated urbanization process Urban China is a joint research report by a team from the World Bank and the Development Research Center of China s State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization The report takes as its point

of departure the conviction that China's urbanization can become more efficient inclusive and sustainable However it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas The report proposes six main areas for reform first amending land management institutions to foster more efficient land use denser cities modernized agriculture and more equitable wealth distribution second adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services third placing urban finances on a more sustainable footing while fostering financial discipline among local governments fourth improving urban planning to enhance connectivity and encourage scale and agglomeration economies fifth reducing environmental pressures through more efficient resource management and sixth improving governance at the local level

*The Struggle to Reform Our Colleges* Derek Bok, 2017-09-05 Why efforts to improve American higher educational attainment haven't worked and where to go from here During the first decade of this century many commentators predicted that American higher education was about to undergo major changes that would be brought about under the stimulus of online learning and other technological advances Toward the end of the decade the president of the United States declared that America would regain its historic lead in the education of its workforce within the next ten years through a huge increase in the number of students earning quality college degrees Several years have elapsed since these pronouncements were made yet the rate of progress has increased very little if at all in the number of college graduates or the nature and quality of the education they receive In *The Struggle to Reform Our Colleges* Derek Bok seeks to explain why so little change has occurred by analyzing the response of America's colleges the influence of students employers foundations accrediting organizations and government officials and the impact of market forces and technological innovation In the last part of the book Bok identifies a number of initiatives that could improve the performance of colleges and universities The final chapter examines the process of change itself and describes the strategy best calculated to quicken the pace of reform and enable colleges to meet the challenges that confront them

**Vibrant and Healthy Kids** National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Population Health and Public Health Practice, Committee on Applying Neurobiological and Socio-Behavioral Sciences from Prenatal Through Early Childhood Development: A Health Equity Approach, 2019-12-27 Children are the foundation of the United States and supporting them is a key component of building a successful future However millions of children face health inequities that compromise their development well being and long term outcomes despite substantial scientific evidence about how those adversities contribute to poor health Advancements in neurobiological and socio behavioral science show that critical biological systems develop in the prenatal through early childhood periods and neurobiological development is extremely responsive to environmental influences during these stages Consequently social economic cultural and environmental factors significantly affect a child's health ecosystem and ability to thrive throughout adulthood *Vibrant and Healthy Kids* Aligning
