Basic and applied research on deception and its detection Wolfgang Ambach,Matthias Gamer,2014-08-07 Deception is a ubiquitous phenomenon in social interactions and has attracted a significant amount of research during the last decades The majority of studies in this field focused on how deception modulates behavioral autonomic and brain responses and whether these changes can be used to validly identify lies Especially the latter question which historically gave rise to the development of psychophysiological lie detection techniques has been driving research on deception and its detection until today The detection of deception and concealed information in forensic examinations currently constitutes one of the most frequent applications of psychophysiological methods in the field With the increasing use of such methods the techniques for detecting deception have been controversially discussed in the scientific community It has been proposed to shift from the original idea of detecting deception per se to a more indirect approach that allows for determining whether a suspect has specific knowledge of crime related details This so called Concealed Information Test is strongly linked to basic psychological concepts concerning memory attention orienting and response monitoring Although research in this field has intensified with the advancement of neuroimaging techniques such as PET and fMRI in the last decade basic questions on the psychological mechanisms underlying modulatory effects of deception and information concealment on behavioral autonomic and brain responses are still poorly understood This Research Topic brings together contributions from researchers in experimental psychology psychophysiology and neuroscience focusing on the understanding of the broad concept of deception including the detection of concealed information with respect to basic research questions as well as applied issues This Research Topic is mainly composed of originalresearch articles but reviews and papers elaborating on novel methodological approaches have also been included Experimental methods include but are not limited to behavioral autonomic electroencephalographic or brain imaging techniques that allow for revealing relevant facets of deception on a multimodal level While this Research Topic primarily includes laboratory work relevant issues for the field use of such methods are also discussed

Fact-Finding without Facts Nancy A. Combs,2010-07-30 Fact Finding Without Facts explores international criminal fact finding empirically conceptually and normatively After reviewing thousands of pages of transcripts from various international criminal tribunals the author reveals that international criminal trials are beset by numerous and severe fact finding impediments that substantially impair the tribunals ability to determine who did what to whom These fact finding impediments have heretofore received virtually no publicity let alone scholarly treatment and they are deeply troubling not only because they raise grave concerns about the accuracy of the judgments currently being issued but because they can be expected to similarly impair the next generation of international trials that will be held at the International Criminal Court After setting forth her empirical findings the author considers their

conceptual and normative implications The author concludes that international criminal tribunals purport a fact finding competence that they do not possess and as a consequence base their judgments on a less precise more amorphous method of fact finding than they publicly acknowledge

A Complete Collection of State Trials and Proceedings for High Treason and Other Crimes and Misdemeanors from the Earliest Period to the Year 1820. (etc.) Thomas Bayly

Howell,1816 The Hidden Histories of War Crimes Trials Kevin Heller,Gerry Simpson,2013-10 Several war crimes trials are well known to scholars but others have received far less attention This book assesses a number of these little studied trials to recognise institutional innovations clarify doctrinal debates and identify their general relevance to the development of international criminal law

Dramas of Heinrich Von Kleist Kim Fordham,2007 What makes the trial so appealing as dramatic form Why do we watch

Is it simply the quest for truth and justice Or is it much more than that From the time of Sophocles the court has fascinated audiences and dramatists alike Kleist is no exception as each of his dramas and many of his stories and anecdotes contain a trial of some sort from its most primitive form of hand to hand combat in the duel to more conventional legal proceedings in secular military and ecclesiastical courts At trial we desire whether consciously or unconsciously to have our own system of beliefs and behaviours affirmed rather than to attempt to achieve justice self interest prevails at the expense of truth and equity The focus of this book is the tension between the restoration of dik the balance of natural order and the pursuit of truth and justice as impetus behind the trial With recourse to the concept of legal instrumentalism which underscores this preference for order over justice in both the law and literature the author examines Kleist s dramas to determine the extent to which those individuals in positions of power are able to manipulate the proceedings seeking not justice and truth but rather the validation of their own particular version of order The trial a tool generally thought to be designed to discover truth and to mete out justice is used instead in the hands of the powerful as an instrument of control and degradation

The Opening Statement of the Prosecution in International Criminal Trials Sofia Stolk,2021-04-20 This book addresses the discursive importance of the prosecution s opening statement before an international criminal tribunal Opening statements are considered to be largely irrelevant to the official legal proceedings but are simultaneously deployed to frame important historical events They are widely cited in international media as well as academic texts yet have been ignored by legal scholars as objects of study in their own right This book aims to remedy this neglect by analysing the narrative that is articulated in the opening statements of different prosecutors at different tribunals in different times It takes an interdisciplinary approach and looks at the meaning of the opening narrative beyond its function in the legal process in a strict sense discussing the ways in which the trial is situated in time and space and how it portrays the main characters It shows how perpetrators and victims places and histories are juridified in a narrative that whilst purporting to legitimise the

trial the tribunal and international criminal law itself is beset with tensions and contradictions Providing an original perspective on the operation of international criminal law this book will be of considerable interest to those working in this area as well as those with relevant interests in International Transnational Law more generally Critical Legal Studies Law and Literature Socio Legal Studies Law and Geography and International Relations **Complete Collection of State**

Suresh,2023-01-17 An ethnography of terrorism trials in Delhi India this book explores what modes of life are made possible in the everyday experience of the courtroom Mayur Suresh shows how legal procedures and technicalities become the modes through which courtrooms are made habitable Where India s terror trials have come to be understood by way of the expansion of the security state and displays of Hindu nationalism Suresh elaborates how they are experienced by defendants in a quite different way through a minute engagement with legal technicalities Amidst the grinding terror trials which are replete with stories of torture illegal detention and fabricated charges defendants school themselves in legal procedures became adept petition writers build friendships with police officials cultivate cautious faith in the courts and express a deep sense of betrayal when this trust is belied Though seemingly mundane legal technicalities are fraught and highly contested and acquire urgent ethical qualities in the life of a trial the file becomes a space in which the world can be made or unmade the petition a way of imagining a future and investigative and courtroom procedures enable the unexpected formation of close relationships between police and terror accused In attending to the ways in which legal technicalities are made to work in everyday interactions among lawyers judges accused terrorists and police Suresh shows how human expressiveness creativity and vulnerability emerge through the law Trials Mary Ann Kelty,1824
