North West Final Examination Question Paper Business Studies 2014:

Regionalism in Africa Daniel C Bach, 2015-12-22 Africa which was not long ago discarded as a hopeless and irrelevant region has become a new frontier for global trade investment and the conduct of international relations This book surveys the socio economic intellectual and security related dimensions of African regionalisms since the turn of the 20th century It argues that the continent deserves to be considered as a crucible for conceptualizing and contextualizing the ongoing influence of colonial policies the emergence of specific integration and security cultures the spread of cross border regionalisation processes at the expense of region building the interplay between territory space and trans state networks and the intrinsic ambivalence of global frontier narratives This is emphasized through the identification of distinctive threads of regionalism which by focusing on genealogies trajectories and ideals transcend the binary divide between old and new regionalisms In doing so the book opens new perspectives not only on Africa in international relations but also Africa's own international relations This text will be of key interest to students and scholars of African politics African history regionalism comparative regionalism and more broadly to international political economy international relations and global and regional governance

Accelerated Land Reform, Mining, Growth, Unemployment and Inequality in South Africa

Nombulelo Gumata, Eliphas Ndou, 2020-01-03 The overarching goal of South Africa's National Development Plan NDP is to eliminate poverty reduce inequality lower unemployment and increase the labour participation This book contributes to academic and policy efforts to achieve these NDP goals We establish that the coal metal ores and the platinum group commodity sectors will underpin the mining as a sunrise industry The export led growth strategy is necessary for intensive employment creation but must be complemented by other micro macroeconomic and industrial policies A strategy of minerals beneficiation is important for intensive employment creation Accelerated land reform is a supply side or structural reform policy intervention tool aimed at increasing potential output changing ownership patterns in the economy increasing entrepreneurship labour absorption economic inclusion and lowering income inequality Evidence shows that the balance sheet channel commodity price booms and busts are intricately linked with the exchange rate dynamics policy uncertainty confidence and the effects of droughts also symptoms of climate change Productivity and investment growth shocks matter for output employment and price stability Evidence indicates that nominal GDP growth above 10 percent and keeping inflation within the target band leads to significant increase in employment and decline in unemployment without inflationary pressures especially when inflation is below 4.5 percent To operationalise the NDP targets align and co ordinate policies the South African Reserve Bank SARB mandate can be expanded to include maximum employment This must be complemented by lowering the inflation target band adjusting the financial regulatory macro prudential and monetary policy frameworks This will enhance the conduct and credibility of monetary and financial stability policies to achieve the set objectives These objectives make policy co ordination pertinent and binding

The UK Regional-National Economic Problem Philip

McCann,2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

drafting and implementation of laws and policies is to examine the interests and incentives of those responsible for these tasks policymakers and bureaucrats If laws and their enforcement offer concrete benefits to these ruling elites they are more likely to be systematically enforced If they don't implementation is selective discretionary if not nil Our first contribution is in extending the application of the concept of the rule of law beyond its traditional focus on specific organizations like the courts and the police to economic sectors such as customs taxation and land inheritance in a search for a direct causal relationship with economic development outcomes Instead of limiting ourselves to a particular type of organization or a legalistic approach to the rule of law we present a broader theory of how laws are made and implemented across different types of sectors and organizations Our second contribution is in demonstrating how powerful interests affect implementation outcomes The incentives elites have to build and support rule of law institutions derive from the distribution of power in society which is partly a historical given The point we make is that it is not deterministic Realigning the incentive structures for reform among key actors and organizations through accountability and competition can dramatically improve the chances that rule of law institutions will take root On the other hand building the capacity of organizations without first changing institutional incentives is likely to lead to perverse outcomes
