articulating online workplaces as real and significant as complex networks of relations that we need to take seriously The emergent culture of networked communication poses many interesting challenges for researchers teachers and writers In an emergent culture even the terminologies we use to identify the subject are contested making it difficult to agree on what we re writing about in the first place not to mention our reasons for studying it or how we might best meet the challenges it poses   Communicating Mobility and Technology Ehren Helmut Pflugfelder,2016-07-07 Winner of the 2018 CCCC Technical and Scientific Communication Award in the category of Best Book in Technical or Scientific Communication Responding to the effects of human mobility and crises such as depleting oil supplies Ehren Helmut Pflugfelder turns specifically to automobility a term used to describe the kinds of mobility afforded by autonomous automobile based movement technologies and their ramifications Thus far few studies in technical communication have explored the development of mobility technologies the immense power that highly structured environmentally significant systems have in the world or the human machine interactions that take place in such activities Applying kinaesthetic rhetoric a rhetoric that is sensitive to and developed from the mobile material context of these technologies Pflugfelder looks at transportation projects such as electric taxi cabs from the turn of the century to modern day open source vehicle projects and a large case study of an autonomous electric pod car network that ultimately failed Kinaesthetic rhetoric illuminates how mobility technologies have always been persuasive wherever and whenever linguistic symbol systems and material interactions enroll us often unconsciously into regimes of movement and ways of experiencing the world As Pflugfelder shows mobility technologies involve networks of sustained arguments that are as durable as the bonds between the actors in their networks   Resources in Education ,2001-04   *Content Everywhere* Sara Wachter-Boettcher,2012-12-12 Care about content Better copy isn t enough As devices and channels multiply and as users expect to relate share and shift information quickly we need content that can go more places more easily Content Everywhere will help you stop creating fixed single purpose content and start making it more future ready flexible reusable manageable and meaningful wherever it needs to go   Writing Workplace Cultures Jim Henry,2000 In Writing Workplace Cultures An Archaeology of Professional Writing Jim Henry analyzes eighty three workplace writing ethnographies composed over seven years in a variety of organizations He views the findings as so many shards in an archaeology on professional writing at the beginning of the twenty first century These ethnographies were composed by either practicing or aspiring writers participating in a Master s program in professional writing and editing Henry solicited the writers participation in informed intersubjective research focused on issues and questions of their own determination Most writers studied their own workplace composing auto ethnographies that problematize these workplaces local cultures even as they depict writing practices within them Henry establishes links between current professional writing practices and composition instruction as both were shaped by national economic development and local postsecondary reorganization throughout the twentieth century He insists that if we accept basic

principles of social constructionism the text demonstrates ways in which writers write workplace cultures to produce goods and services whose effects go far beyond the immediate needs of its clients   *Solving Problems in Technical Communication* Johndan Johnson-Eilola,Stuart A. Selber,2012-12-26 The field of technical communication is rapidly expanding in both the academic world and the private sector yet a problematic divide remains between theory and practice Here Stuart A Selber and Johndan Johnson Eilola both respected scholars and teachers of technical communication effectively bridge that gap Solving Problems in Technical Communication collects the latest research and theory in the field and applies it to real world problems faced by practitioners problems involving ethics intercultural communication new media and other areas that determine the boundaries of the discipline The book is structured in four parts offering an overview of the field situating it historically and culturally reviewing various theoretical approaches to technical communication and examining how the field can be advanced by drawing on diverse perspectives Timely informed and practical Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career   *Augmentation Technologies and Artificial Intelligence in Technical Communication* Ann Hill Duin,Isabel Pedersen,2023-06-01 This book enables readers to interrogate the technical rhetorical theoretical and socio ethical challenges and opportunities involved in the development and adoption of augmentation technologies and artificial intelligence The core of our human experience and identity is forever affected by the rise of augmentation technologies that enhance human capability or productivity These technologies can add cognitive physical sensory and emotional enhancements to the body or environment This book demonstrates the benefits risks and relevance of emerging augmentation technologies such as brain computer interaction devices for cognitive enhancement robots marketed to improve human social interaction wearables that extend human senses augment creative abilities or overcome physical limitations implantables that amplify intelligence or memory and devices AI generators or algorithms for emotional augmentation It allows scholars and professionals to understand the impact of these technologies improve digital and AI literacy and practice new methods for their design and adoption This book will be vital reading for students scholars and professionals in fields including technical communication UX design computer science human factors information technology sociology of technology and ethics Artifacts and supplemental resources for research and teaching can be found at https fabricofdigitallife com and www routledge com 9781032263755   Content Strategy in Technical Communication Guiseppe Getto,Jack Labriola,Sheryl Ruszkiewicz,2019-09-19 Content Strategy in Technical Communication provides a balanced comprehensive overview of the current state of content strategy within the field of technical communication while showcasing groundbreaking work in the field Emerging technologies such as content management systems social media platforms open source information architectures and application programming interfaces provide new opportunities for the creation publication and delivery of content Technical communicators are now sometimes responsible for such diverse roles
