From Street-smart to Web-wise® Al Marcella, Brian Moore, Madeline Parisi, 2025-03-13 In Book 3 fifth and sixth graders are maturing becoming more independent and online activities are second nature From Street smart to Web wise A Cyber Safety Training Manual Built for Teachers and Designed for Children isn't just another book it's a passionate call to action for teachers It is a roadmap to navigate the digital landscape safely with confidence and care as the critical job of ensuring students safety as the digital world expands Written by authors who are recognized experts in their respective fields this accessible manual is a timely resource for educators This book helps us dive into engaging content that illuminates the importance of cyber safety not only in our classrooms but also in the global community Each chapter is filled with practical examples stimulating discussion points and ready to use lesson plans tailored for students in fifth and sixth grades Regardless of your technology skill level this book will provide you with the guidance and the tools you need to make student cyber safety awareness practical fun and impactful As parents partner with educators to create cyber secure spaces this book stands as a framework of commitment to that partnership It's a testament to taking proactive steps in equipping our young learners with the awareness and skills they need to tread the digital world securely By choosing From Street smart to Web wise A Cyber Safety Training Manual Built for Teachers and Designed for Children you position yourself at the forefront of educational guardianship championing a future where our children can explore learn and grow online without fear Join us on this journey to empower the next generation one click at a time

Modern Mathematical Methods For Scientists And Engineers: A Street-smart Introduction Athanassios Fokas, Efthimios Kaxiras, 2022-12-12 Modern Mathematical Methods for Scientists and Engineers is a modern introduction to basic topics in mathematics at the undergraduate level with emphasis on explanations and applications to real life problems There is also an Application section at the end of each chapter with topics drawn from a variety of areas including neural networks fluid dynamics and the behavior of put and call options in financial markets The book presents several modern important and computationally efficient topics including feedforward neural networks wavelets generalized functions stochastic optimization methods and numerical methods A unique and novel feature of the book is the introduction of a recently developed method for solving partial differential equations PDEs called the unified transform PDEs are the mathematical cornerstone for describing an astonishingly wide range of phenomena from quantum mechanics to ocean waves to the diffusion of heat in matter and the behavior of financial markets Despite the efforts of many famous mathematicians physicists and engineers the solution of partial differential equations remains a challenge The unified transform greatly facilitates this task For example two and a half centuries after Jean d'Alembert formulated the wave equation and presented a solution for solving a simple problem for this equation the unified transform derives in a simple manner a generalization of the d'Alembert solution valid for general boundary value problems Moreover two centuries after Joseph Fourier introduced the classical tool of the Fourier series for solving the heat equation the unified

transform constructs a new solution to this ubiquitous PDE with important analytical and numerical advantages in comparison to the classical solutions The authors present the unified transform pedagogically building all the necessary background including functions of real and of complex variables and the Fourier transform illustrating the method with numerous examples Broad in scope but pedagogical in style and content the book is an introduction to powerful mathematical concepts and modern tools for students in science and engineering **Resources in Education** ,1998
