

Student Exploration: Photosynthesis Lab

By Nidhi Karavadra

Gizmo Warm-up

During photosynthesis, plants use the energy of light to produce glucose ($C_6H_{12}O_6$) from carbon dioxide (CO_2), and water (H_2O). Glucose is a simple sugar that plants use for energy and as a building block for larger molecules.

A by-product of photosynthesis is oxygen. Plants use some of the oxygen they produce, but most of it is released. In the Photosynthesis Lab Gizmo, you can monitor the rate of photosynthesis by measuring oxygen production.

1. Observe the left pane closely. What do you think the bubbles are?
 - Oxygen gas.
2. Select the BAR CHART tab. On the graph, notice the **Oxygen production** bar. Move the **Light intensity** slider back and forth. How does light intensity affect oxygen production?
 - As light intensity decreases oxygen production decreases and when the light intensity increases the production of oxygen increases too however after a certain % of light intensity (38%) oxygen produced stays the same.
3. Experiment with the vertical **Temperature** slider (upper left) and the **CO₂** level slider.
 - A. How does temperature affect oxygen production?
 - As the temperature increases the oxygen production increase however after 28 degrees the production of oxygen starts to fall.
 - B. How does CO₂ level affect oxygen production?
 - As CO₂ level rise oxygen production increase however after 360 ppm oxygen produced stays the same
 - C. How does oxygen production relate to the rate of photosynthesis?
 - The higher the rate of photosynthesis is, the higher is oxygen production.
 - D. What is the formula for photosynthesis?
 - $6CO_2 + 6H_2O \rightarrow C_6H_{12}O_6 + 6O_2$

Activity A: Colored light

Get the Gizmo ready:

- Select the COLOR tab and the BAR CHART tab.
- Set the Temperature to 24°C, the Light intensity to 90%, and the CO₂ level to 1,000 ppm.

Introduction: Plants use a green pigment called **chlorophyll** to absorb light and convert energy into a form that the plant can use. Chlorophyll gives plants their green color.

Resources in Education, 1996 Integrating Engineering and Science in Your Classroom Eric Brunsell, 2012-09-15 From the very first day you use them the design challenges in this compendium will spur your students too to jump right in and engage throughout the entire class The activities reinforce important science content while illustrating a range of STEM skills The 30 articles have been compiled from NSTAOCOs journals for elementary through high school Next time you need an engaging STEM activity you'll be glad you have this collection to help you blend meaningful and memorable experiences into your lessons **Report**, 1960 Scientific and Technical Aerospace Reports, 1994 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database **The Software Encyclopedia**, 1988

Time-Series Observations of Ocean Acidification: a Key Tool for Documenting Impacts on a Changing Planet

Abed El Rahman Hassoun, Adrienne J. Sutton, Sam Dupont, Jose Martin Hernandez-Ayon, Xianghui Guo, 2025-04-15 Ocean acidification is a global phenomenon with local effects Marine ecosystems are facing multiple stressors leading to significant changes Time series observations are the basis to understand these changes and distinguishing between natural and anthropogenic variability of physical chemical and biological components of marine environments Moreover field monitoring is often neglected as a tool to document the responses of marine organisms and key habitats to ocean acidification Time series observations of ocean acidification are thus critical to understanding the current threats that the ocean's ecosystems are witnessing and efficiently developing and implementing adaptation and mitigation solutions Time series dedicated to observing ocean acidification other stressors as well as biological parameters are the baseline for long term assessment of the ocean's health and for evaluating the efficiency of local and global actions toward achieving climate targets Therefore the goal of this Research Topic is to highlight the latest research efforts conducted to document ocean acidification patterns and trends and their consequences on marine life In this issue we will focus on new and old time series stations efforts to bridge physical chemical and biological observations and their application for modeling and future projections *Encyclopedia of Distance Learning, Second Edition* Rogers, Patricia L., Berg, Gary A., Boettcher, Judith V., Howard, Caroline, Justice, Lorraine, Schenk, Karen D., 2009-01-31 Offers comprehensive coverage of the issues concepts trends and technologies of distance learning Index Medicus, 2003 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings
