Name: _____

1. Define biotechnology.
2. What are some benefits of biotechnology?
3. How does the health care industry use biotechnology?
4. How do food and agriculture industries use biotechnology?
5. What is a genetic modification?
6. Explain what cloning is. Why is it ok to clone an animal but not a human?
7. Define ethics.
8. How do ethics impact biotechnology?
9. List careers associated with biotechnology.
10. How is North Carolina's economy affected by biotechnology?
11. What is DNA fingerprinting and how does it help solve crimes?
12. What is bioremediation?
13. Give two examples of when bioremediation has been used.

-
14. A genome is...
- A) A sequence of units in a short segment of DNA.
 - B) A gene inserted into a bacterial chromosome.
 - C) The complete sequence of an organism's DNA.
 - D) Part of a chromosome.
15. Which is an example of genetic modification?
- A) Using herbicides
 - B) Crossbreeding
 - C) Heart surgery
 - D) Gene splicing

Study Guide Biotechnology 8th Grade Bacteria:

Bacterial Genetics and Genomics Lori Snyder, Lori A.S. Snyder, 2024-04-29 Understanding of bacterial genetics and genomics is fundamental to understanding bacteria and higher organisms as well. Novel insights in the fields of genetics and genomics are challenging the once clear borders between the characteristics of bacteria and other life. Biological knowledge of the bacterial world is being viewed under a new light with input from genetic and genomics. Replication of bacterial circular and linear chromosomes, coupled and uncoupled transcription and translation, multiprotein systems that enhance survival, wide varieties of ways to control gene and protein expression, and a range of other features all influence the diversity of the microbial world. This text acknowledges that readers have varied knowledge of genetics and microbiology. Therefore, information is presented progressively to enable all readers to understand the more advanced material in the book. This second edition of *Bacterial Genetics and Genomics* updates the information from the first edition with advances made over the past five years. This includes descriptions for 10 types of secretion systems, bacteria that can be seen with the naked eye, and differences between coupled transcription translation and the uncoupled runaway transcription in bacteria. Topic updates include advances in bacteriophage therapy, biotechnology, and understanding bacterial evolution. Key Features: Genetics, genomics, and bioinformatics integrated in one place. Over 400 full colour illustrations explain concepts and mechanisms throughout and are available to instructors for download. A section dedicated to the application of genetics and genomics techniques, including a chapter devoted to laboratory techniques which includes useful tips and recommendations for protocols, in addition to troubleshooting and alternative strategies. Bulleted key points summarize each chapter. Extensive self study questions related to the chapter text and several discussion topics for study groups to explore further. This book is extended and enhanced through a range of digital resources that include Interactive online quizzes for each chapter, Flashcards that allow the reader to test their understanding of key terms from the book, Useful links for online resources associated with Chapters 16 and 17. *Resources for Teaching Middle School Science* Smithsonian Institution, National Academy of Engineering, National Science Resources Center of the National Academy of Sciences, Institute of Medicine, 1998-04-30 With age appropriate inquiry centered curriculum materials and sound teaching practices, middle school science can capture the interest and energy of adolescent students and expand their understanding of the world around them. *Resources for Teaching Middle School Science* developed by the National Science Resources Center (NSRC) is a valuable tool for identifying and selecting effective science curriculum materials that will engage students in grades 6 through 8. The volume describes more than 400 curriculum titles that are aligned with the National Science Education Standards. This completely new guide follows on the success of *Resources for Teaching Elementary School Science*, the first in the NSRC series of annotated guides to hands on inquiry centered curriculum materials and other resources for science teachers. The curriculum materials in the new guide are grouped in five chapters by scientific area: Physical Science, Life

Science Environmental Science Earth and Space Science and Multidisciplinary and Applied Science They are also grouped by type core materials supplementary units and science activity books Each annotation of curriculum material includes a recommended grade level a description of the activities involved and of what students can be expected to learn a list of accompanying materials a reading level and ordering information The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide The criteria reflect and incorporate goals and principles of the National Science Education Standards The annotations designate the specific content standards on which these curriculum pieces focus In addition to the curriculum chapters the guide contains six chapters of diverse resources that are directly relevant to middle school science Among these is a chapter on educational software and multimedia programs chapters on books about science and teaching directories and guides to science trade books and periodicals for teachers and students Another section features institutional resources One chapter lists about 600 science centers museums and zoos where teachers can take middle school students for interactive science experiences Another chapter describes nearly 140 professional associations and U S government agencies that offer resources and assistance Authoritative extensive and thoroughly indexed and the only guide of its kind Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers school administrators teacher trainers science curriculum specialists advocates of hands on science teaching and concerned parents
