Studies In Temporal Urbanism The Urbantick Experiment:

Studies in Temporal Urbanism Fabian Neuhaus,2011-08-04 This book is very much about what the name urbanTick literally says about the ticking of the urban the urban as we experience it everyday on the bus in the park or between buildings It is about the big orchestrated mass migration of commuters the seasonal blossoms of the trees along the walkway and the frequency of the stamping rubbish eater trucks It is also not to forget about climate infrastructure opening hours term times parking meters time tables growing shadows and moon light But most of all it is about how all this is experienced by citizens on a daily basis and how they navigate within this complex structure of patterns The content of this book is based on the content of the urbanTick blog between 2008 2010 One year blogging about this topic brought together a large collection of different aspects and thoughts It is not at all a conclusive view the opposite might be the case it is an exploratory work in progress while trying to capture as many facets of the topic as possible

Temporal Urban Design Filipa Matos Wunderlich,2023-12-19 Temporal Urban Design Temporality Rhythm and Place examines an alternative design approach focusing on the temporal aesthetics of urban places and the importance of the sense of time and rhythm in the urban environment The book departs from concerns on the acceleration of cities its impact on the urban quality of life and the liveability of urban spaces and questions on what influences the sense of time and how it expresses itself in the urban environment From here it poses the questions what time is this place and how do we design for it It offers a new aesthetic perspective akin to music brings forward the methodological framework of urban place rhythm analysis and explores principles and modes of practice towards better temporal design quality in our cities The book demonstrates that notions of time have long been intrinsic to planning and urban design research agendas and whilst learning from philosophy urban critical theory and both the natural and social sciences debate on time it argues for a shift in perspective towards the design of everyday urban time and place timescapes Overall the book explores the value of the everyday sense of time and rhythmicity in the urban environment and discusses how urban designers can understand analyse and ultimately play a role

in the creation of temporally unique both sensorial and affective places in the city The book will be of interest to urban planners designers landscape architects and architects as well as urban geographers and all those researching within these disciplines It will also interest students of planning urban design architecture urban studies and of urban planning and design theory

Technologies for Urban and Spatial Planning: Virtual Cities and Territories Pinto, Nuno Norte,2013-07-31 This book covers a multitude of newly developed hardware and software technology advancements in urban and spatial planning and architecture drawing on the most current research and studies of field practitioners who offer solutions and recommendations for further growth specifically in urban and spatial developments from URBAN DESIGN to LANDSCAPE URBANISM

Sarıyya ARSLAN,Erkan POLAT,2025-04-16 Landscape Urbanism is a planning and design theory and a model of practice that argues that the best way to organize cities is through the design of the city s landscape rather than just the design of built or unbuilt areas In this context it is positioned within larger scale cultural historical and theoretical formations Landscape Urbanism is a response to the limited perception or depiction of the current project and site context by both Urban Planners and Architects and Landscape Architects It is also a concept that has been strategically introduced by these design and planning oriented professions and jobs especially in terms of Urban Design as a way to differentiate the context and is used more in a Western oriented way and has been put forward as a response to the increasingly undefined role that Landscape Architects find themselves in Landscape Urbanism describes the ability to produce urban effects that have traditionally been achieved through the construction of buildings on built up areas simply through the organization of horizontal surfaces Although first coined in the mid 1990s the term Landscape Urbanism has adopted many different uses but is most often associated with Urban Design and as a Postmodernist or even New Modernist response to the spatial scale failures of the New Urbanism the departure from comprehensive visions and demands for Modern architecture and Urban Planning

Researching the City Kevin Ward,2020-01-03 This practical urban studies research guide for students revised and with new chapter additions focuses on the city and on the different ways to research it

Cognition and the Built Environment Ole Möystad,2017-12-12 Cognition and the Built Environment argues that interacting with our built environment as users and as architects is a cognitive process It claims that architecture in its form and meaning is a basic embodied level of human cognition The assumption is that we and our built environment together form an intelligent system a cognitive feedback loop between us and the world of which we are part With this as a vantage point the book discusses the meaning and intelligence of concrete architectural environments as well as the agency of the architect of his client and of the user The inquiry oscillates between abstract thought topological models and cognitive semiotics between pragmatist philosophy and the professional practice of planning cities developing projects and using objects Architecture serves more complex purposes than our caves paths and landmarks did Written for students and academics of urban design urban planning and architectural theory Cognition and the Built Environment argues that human

cognition feeds on the interaction between thought agency and built environment and that architecture is the spatial form of this interaction *Deklinacja odnowy miast*, 2012 **Life-Destroying Diagrams** Eugenie Brinkema, 2022-01-14 In *Life Destroying Diagrams* Eugenie Brinkema brings the insights of her radical formalism to bear on supremely risky terrain the ethical extremes of horror and love Through close readings of works of film literature and philosophy she explores how diagrams grids charts lists abecedaria toroids tempos patterns colors negative space lengths increments and thresholds attest to formal logics of torture and cruelty violence and finitude friendship and eros debt and care Beginning with a wholesale rethinking of the affect of horror orienting it away from entrenched models of feeling toward impersonal schemes and structures Brinkema moves outward to consider the relation between objects and affects humiliation and metaphysics genre and the general bodily destruction and aesthetic generation geometry and scenography hatred and value love and measurement and ultimately the tensions hazards and speculative promise of formalism itself Replete with etymological meditations performative typography and lyrical digressions *Life Destroying Diagrams* is at once a model of reading without guarantee and a series of generative experiments in the writing of aesthetic theory *Transforming Cities Through Temporary Urbanism* Lauren Andres, Amy Y. Zhang, 2020-12-18 This book advances the reflexion into how temporary urbanism is shaping cities across the world Temporary urbanism has become a core concept in urban development and its application is increasingly crossing the borders of both the North and the Global South There is a need to reflect upon the diverse ways of understanding and implementing the temporary in the production of space internationally and discuss what this means for both research and practice Divided into two sections the book compiles and reflects upon the various attempts to reframe and reconceptualise temporary urbanism The first section focuses on reframing and reconceptualising temporary urbanisms It develops the argument that temporary urbanism allows a reinterrogation of the role of temporalities and non permanence into the place making process and hence in the production and reproduction of cities including the adaptability of existing spaces and production of new spaces While drawing upon different theoretical and conceptual framings permeability assemblage rhythms waiting authors bring insights from various case studies the Dublin Biennial Ireland temporary uses in Geneva Switzerland temporary urban settlements in sub Saharan Africa refugees camp in Beirut Lebanon and political protests in Skopje Republic of Macedonia The second section looks at unwrapping the complexity and diversity of temporary urbanisms It aims at securing a better understanding of the complexity and diversity of temporary urbanism including a dialogue between various experiences both in the Global North and in the Global South It looks at the implications of temporary urbanism in the delivery of planning and considers how and by whom cities are governed and transformed Again a range of examples are mobilised by contributors spanning from temporary uses and projects in London UK Santiago Chile Paris France Vancouver Canada Barcelona Spain Budapest Hungary Beijing China Sao Paulo Brazil and Milwaukee USA This book will be of interests to all researchers practitioners and students who want to gain a more thorough

understanding of the topic of temporary urbanism compare its diversity and similarities across different contexts and reflect on the wider implications of temporary urbanisms for urban transformations

Cities in Time Ali Madanipour,2017-02-23
Introduction The multiple times of the city Instrumental temporality Regulating time in everyday life Accelerated cities
Existential temporality Memory and identity in the city The phenomenology of anxiety Experimental temporality Events and interventions from pop ups to Olympic parks Conclusion Temporary urbanism as symptom response and catalyst

Emergent Spatio-temporal Dimensions of the City Fabian Neuhaus,2015-01-05 This book focuses on the creation of space as an activity The argument draws not only on aspects of movement in time but also on a cultural and specifically social context influencing the creation of the spatial habitus The book reconsiders existing theories of time and space in the field of urban planning and develops an updated account of spatial activity experience and space making Recent developments in spatial practice specifically related to new technologies make this an important and timely task Integrating spatial temporal dynamics into the way we think about cities aids the implementation of sustainable forms of urban planning The study is composed of two different case studies One case is based on fieldwork tracking individual movement using GPS the other case utilises data mined from Twitter One of the key elements in the conclusion to this book is the definition of temporality as a status rather than a transition It is argued that through repetitive practices as habitus time has presence and agency in our everyday lives This book is based on the work undertaken for a PhD at the Centre for Advanced Spatial Analysis and was and accepted as thesis by University College London in 2013

The Experimental City James Evans,Andrew Karvonen,Rob Raven,2016-05-20 This book explores how the concept of urban experimentation is being used to reshape practices of knowledge production in urban debates about resilience climate change governance and socio technical transitions With contributions from leading scholars and case studies from the Global North and South from small to large scale cities this book suggests that urban experiments offer novel modes of engagement governance and politics that both challenge and complement conventional strategies The book is organized around three cross cutting themes Part I explores the logics of urban experimentation different approaches and how and why they are deployed Part II considers how experiments are being staged within cities by whom and with what effects Part III examines how entire cities or groups of cities are constructed as experiments This book seeks to contribute a deeper and more socially and politically nuanced understanding of how urban experiments shape cities and drive wider changes in society providing a framework to examine the phenomenon of urban experimentation in conceptual and empirical detail

Adaptable Cities and Temporary Urbanisms Lauren Andres,2025-02-04 Cities are typically thought of as permanent Structures streets infrastructure and other features of the built environment even if they are periodically replaced are intended to endure But temporary flexible spaces and uses are essential to how cities function and the ways urban dwellers inhabit them Such adaptability moreover is fundamental if cities are to meet the challenges of the future This book examines temporary urbanisms across varied global

contexts considering their significance for cities and everyday life as well as for policy and practice It brings together many distinct forms and facets of temporariness and adaptability from sites of consumption by privileged residents to the survival strategies of marginalized groups drawing on examples spanning five continents Lauren Andres explores the driving forces of adaptability as well as the power dynamics and tensions between temporariness and permanence She highlights how adaptability enhances livability sustainability and resilience showing its importance for addressing crises such as climate change socioeconomic inequalities and pandemics Authoritative and wide ranging Adaptable Cities and Temporary Urbanisms reveals why experimentation and creativity are crucial to the present and future of cities
