Resources in Vocational Education ,1980

Federal Register, 1996-01-02 Yearbook for ... Guide to Services and Staff for ... Illinois Association of School Boards, 1995 *Violence in the Schools* Jyl MacDougall, Canadian Education Association, 1993 A look at why Canadian schools are becoming more violent and what we can do to prevent this *Management Competency for Physical Activity Education and Sport* Earle F. Zeigler, Gary W. Bowie, 2007-08-24 The introduction of this combined text and laboratory workbook with its tear out sheets on which to complete specific experiences is a first in the field It can be employed either by itself or in connection with a standard text that has limited or no practical exercises included If desirable also the instructor could amplify what is offered here by the addition of other laboratory experiences developed from the listing in Part I of well over 100 desirable experiences under the five broad categories included A comprehensive analysis of management science literature indicated the need to introduce a step by step plan for management skill or competency attainment In doing so the authors built on Katz's Harvard tripartite categorization of skills and expanded it to five subdivisions so as to cover also the personal attributes needed by the prospective manager as well as those conjoined skills gained through a combinatorial process that the individual is required to employ on the job What Katz calls human skills we now call interpersonal skills so as to distinguish this category from personal skills No 1 below These subdivisions or categories are therefore as follows 1 Personal skills or developing one's own individual competencies prior to concentrating on the managerial task 2 Interpersonal skills or acquiring the skills needed to influence people positively to work toward accomplishment of organizational objectives and goals 3 Conceptual skills or learning to formulate ideas and plans while on the job as a manager 4 Technical skills or acquiring the various skills and techniques needed to cope with the various organizational details and problems that arise 5 Conjoined skills or developing the various managerial skills in some combination or proportion to achieve both immediate and long range objectives and goals Granting that Katz's categories of human interpersonal as we call it conceptual and technical managerial skills along with our additional subdivisions of so called personal and conjoined skills are not mutually exclusive this plan enables the teacher and the students to move selectively from theory to practice within each of the five categories described The method for working toward the achievement of the specific competencies or skills is 1 through the provision of statements describing the objectives of the modules used to develop the competencies 2 to offer knowledge statements introducing the trainee to the theoretic bases of the competencies and their roles and functions in the management process and 3 by recommending selected laboratory exercises for achieving a degree of success at least based on involvement in a variety of problem solving experiences After the student comprehends the problem to be met or solved a questioning process determines 1 what needs to be known 2 where this information may be obtained 3 how to organize the actual learning experience 4 what the probable result will be and 5 how to evaluate the level of competency attainment where such is possible The teaching and learning process employed by the instructor is designed therefore to include a variety of laboratory experiences The tear out sheets for each laboratory experience are to be completed and handed in as

indicated by the course instructor In addition to standard lecture and discussion techniques that we assume will be included by the instructor other learning devices available can include use of the case method role playing independent study interaction with a personal computer elementary theory formulation response to questionnaires and self testing devices individual projects small discussion groups etc When the instructor wishes and there is class time available he or she can introduce action or applied research based independent investigation e g survey game theory debates internship experiences panels forums and so forth Basically a fivefold learning process is recommended This process employs three steps 1 understanding of the objective of the learning experience module 2 reading and comprehension of a knowledge statement or lecturette about the particular skill involved and 3 skill learning through analysis and practice Thus the instructor can 1 assess initial student status 2 introduce selected experiences to strengthen areas of possible weakness and subsequently 3 evaluate competency attainment
