

School Uniform: Correlation between Wearing Uniforms and Academic Performance

 Exclusively available on IvyPanda

Introduction

Earlier researches have indicated that there is a strong positive correlation between wearing of uniforms and academic performance. Furthermore the use of uniforms has had a control on social behavior. Decency is of the essence for any scholar or even worker. The issue of putting on a uniform in the different spheres of life cannot be underrated, it should instead be taken with due importance.

Different countries in the world have their own standardized mode of dressing depending on their cultures, religion or social class. For any successful learning institution, the selection criterion for a uniform is an aspect that should be taken with great consideration. The combination of colors for example, may affect the students' comfort as well as the public view and perception of the institution (Daugherty 392)

The issue of cost should also be put in to check. This is because in many third world countries like Lesotho, it was found that school drop out rate is very high due to the fact that many families cannot afford the high price of uniforms. Other countries have no regard for school uniforms due to their past history. A good example is Italy where children were forced to wear uniforms in and out of school during the Second World War.

Behavior and School Uniforms

Dropping out and breaking laws tend to be the common responses for students who have negative experiences in school. Schools are supposed to offer a constructive, positive, secure and safe environment for learning. Students should feel protected enough to discover, explore and build up their scholarly and social competencies.

School Uniforms. Research Brief Karen Walker,2007 Does clothing make the person or does the person make the clothing How does what attire a student wears to school affect their academic achievement In 1996 President Clinton cited examples of school violence and discipline issues that might have been avoided had the students been wearing uniforms School uniforms Prevention or suppression In his 1998 State of the Union address he mentioned the positive impact uniforms had made in the Long Beach Unified School District which has a highly diverse ethnic and socioeconomic population that is also the third largest district in California

When students have continuous negative experiences in school dropping out and delinquency tend to be the common responses The role of schools is to provide a positive safe and secure learning environment where students feel protected enough to explore and develop their intellectual and social competencies Hard evidence that proves the wearing of uniforms provides a direct link to better academic achievement is not conclusive however there is evidence that supports there are fewer discipline problems referrals and violence as well as higher attendance rates since the implementation of a uniform policy What appears to have been overlooked in the data analysis is the effect of other programs that are often being implemented at the same time as the uniform policy and may also have a direct impact on the discipline and attendance issues There are many arguments for and against school uniform policies The pros and cons of school uniform are listed in this paper Contains 14 online resources

Global Japan Roger Goodman,Ceri Peach,Ayumi Takenaka,Paul White,2005-06-27 The Japanese have long regarded themselves as a homogenous nation clearly separate from other nations However this long standing view is being undermined by the present international reality of increased global population movement This has resulted in the establishment both of significant Japanese communities outside Japan and of large non Japanese minorities within Japan and has forced the Japanese to re conceptualise their nationality in new and more flexible ways This work provides a comprehensive overview of these issues and examines the context of immigration to and emigration from Japan It considers the development of important Japanese overseas communities in six major cities worldwide the experiences of immigrant communities in Japan as well as assessing the consequences for the Japanese people s view of themselves as a nation
