and

p 6

Aboriginal peoples have been using chemical substances for thousands of years to preserve food, treat illness, build tools and decorate clothing. Many of these traditional processes are still used today.

Many chemicals, even household products, have dangerous properties and must be handled properly. An **MSDS**, or **Material Safety Data Sheet**, lists important information including physical properties (ie melting and boiling points), chemical dangers, and how to store and dispose of the chemical. See figure 1.3 p7.

The **WHMIS** or **Workplace Hazardous Materials Information Systems** informs users of the dangers of working with specific chemicals by informative labels on the chemical container, MSDS paperwork and worker training programs. See figure 1.4 p8 for examples of WHMIS symbols.
