Study Guide

You may answer the questions in note format. You do not need to write in full and complete sentences.

1. Describe AND give an example of relative position.
The change in one object's position compared with another object's position is called relative motion. Possible answer: Seeing things move past you when you are in a moving car.

2. Do objects with more mass need greater force to move them? Why?
Yes, the more mass an object has, the more force needs to be applied to move the object.

3. How can you move an object a greater distance than someone else?
Apply more force.

4. Define balanced force AND describe how it acts on objects.
Balanced forces are when the same amount of force is applied in opposite directions. Balanced forces prevent an object from moving.
