Assessment Reform in Science Benny B.H.W Yung,2006-02-03 Fairness and Fear I was startled at the subtitle of the book when I first heard it Our series has some imaginative titles but none so evocative as this one But fear and fairness capture much of teacher thinking about assessment Indeed teachers struggle to be fair with students certainly concerned and often fearful of failures to be fair and repercussions that teachers can face as a result Then there is the fearful enterprise of imposed assessment regimes that many teachers face Dr Yung's book allows us to hear from the teachers on these concerns this is no top down policy statement His account is readable and highly instructive and I hope that copies will find their way to the desks of many school administrators and policy personnel We are indeed pleased to release this volume William W Cobern Book Series Editor 2000 2005 Foreword by Peter Fensham Two things are very clear to me about formal educational systems What is assessed in these systems determines what teachers and students recognize as knowledge of worth Teachers in general are conscientious in doing their best to ensure that their students will learn this knowledge of worth well Science has now been widely acknowledged to be a core or key subject in the overall curriculum of schooling at all levels **Holt Science and Technology** Holt Rinehart & Winston,Holt, Rinehart and Winston Staff,2001-07 *A Leader's Guide to Science Curriculum Topic Study* Susan Mundry,Page Keeley,Carolyn Landel,2009-11-24 The Curriculum Topic Study CTS process funded by the US National Science Foundation helps teachers improve their practice by linking standards and research to content curriculum instruction and assessment Key to the core book Science Curriculum Topic Study this resource helps science professional development leaders and teacher educators understand the CTS approach and how to design lead and apply CTS in a variety of settings that support teachers as learners The authors provide everything needed to facilitate the CTS process including a solid foundation in the CTS framework multiple designs for half day and full day workshops professional learning communities and one on one instructional coaching facilitation group processing and materials management strategies and a CD ROM with handouts PowerPoint slides and templates By bringing CTS into schools and other professional development settings science leaders can enhance their teachers knowledge of content improve teaching practices and have a positive impact on student learning **Big Science, Innovation, and Societal**
