Uncovering Student Ideas in Science: 25 formative assessment probes Page Keeley, 2005 Using probes as diagnostic tools that identify and analyze students' preconceptions, teachers can easily move students from where they are in their current thinking to where they need to be to achieve scientific understanding. *Forty-five New Force and Motion Assessment Probes* Page Keeley, Rand Harrington, 2010. Nationally known science educator Page Keeley, principal author of the hugely popular four-volume NSTA Press series *Uncovering Students' Ideas in Science*, has teamed up with physicist and science educator Rand Harrington to write this first volume in their new series on physical science. They begin with one of the most challenging topics in physical science: force and motion. The 45 assessment probes in this book enable teachers to find out what students really think about key ideas in force and motion. The Teacher Notes, which can be used before and after administering the probe, provide background information on the purpose of the probe, related concepts, an explanation for the teacher of the force and motion idea being taught, related ideas in Benchmarks for Science Literacy and the National Science Education Standards, research on typical student misconceptions related to the force and motion concept, and suggestions for instruction and assessment. The book specifies grade spans K-4, 5-8, 9-12 for each probe based on state and national standards and suggests ways to adapt a probe for a different grade span or context. Uncovering Student Ideas in Science: 25 new formative assessment probes Page Keeley, Joyce Tugel, 2009. Wouldn't it be helpful to know what your students' ideas are about a science concept before launching into a new lesson or unit? *Uncovering Student Ideas in Science Volume 4* offers 25 more formative assessment probes to help reveal students' preconceptions of fundamental concepts in science, bringing the total to 100 probes for the popular series by author Page Keeley. Teachers of grades K-12 will find short probes with grade-band specifics that provide easy-to-follow suggestions for addressing students' ideas by promoting learning through conceptual change instruction. Volume 4 adds to the probes in physical life and Earth and space science with a new category called unifying principles. Also covered is a discussion on balancing formative assessment with summative assessment. *EDUCATION & SCIENCE 2023-IV* Songül KARABATAK, 2024-01-11.
