Optical Interferometry Alexandr Banishev, Jue Wang, Mithun Bhowmick, 2017-02-15 Optical methods of measurements are the most sensitive techniques of noncontact investigations and at the same time they are fast as well as accurate which increases reproducibility of observed results In recent years the importance of optical interferometry methods for research has dramatically increased and applications range from precise surface testing to finding extrasolar planets This book covers various aspects of optical interferometry including descriptions of novel apparatuses and methods application interferometry for studying biological objects surface qualities materials characterization and optical testing The book includes a series of chapters in which experts share recent progress in interferometry through original research and literature reviews

Technical Manual United States Department of the Army, 1954 **Designing with Light** J. Michael Gillette, Michael McNamara, 2025-01-20 Now in its eighth edition *Designing with Light* introduces readers to the art craft and technology of stage lighting to help them create designs that shape the audience's emotional reaction to and understanding of a stage production This new edition is fully updated to include current information on the technology and equipment of stage lighting lighting fixtures lamps cabling dimmers control boards and LED tape as well as electrical theory Readers will learn how designed light is used to enhance the audience's understanding and enjoyment of a production The book includes specific information on drafting the light plot explores the challenges of designing for different stage configurations and provides examples of lighting designs for dramas musicals and dance It also features comments and thoughts from active designers from both mainstream theatrical productions and related industries and has a new emphasis on diversity and inclusion related practices and language Written for students of lighting design and technology as well as professional technicians and designers *Designing with Light* offers a comprehensive survey of the practical and aesthetic aspects of stage lighting design

Software Engineering, Artificial Intelligence, Networking and Parallel/Distributed Computing Roger Lee, 2022-01-03 This book presents scientific results of the 22nd ACIS International Fall Virtual Conference on Software Engineering Artificial Intelligence Networking and Parallel Distributed Computing SNPD2021 Fall which was held on November 24 26 2021 at Taichung Taiwan The aim of this conference was to bring together researchers and scientists businessmen and entrepreneurs teachers engineers computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way Research results about all aspects theory applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them The conference organizers selected the best papers from those papers accepted for presentation at the conference The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review From this second round of review 13 of most promising papers are then published in this Springer SCI book and not the conference proceedings We impatiently await the important contributions that we know these authors will bring to the field of computer and information science
