LeVeque, Mauricio J. del Razo, 2020-06-26 This book addresses an important class of mathematical problems the Riemann problem for first order hyperbolic partial differential equations PDEs which arise when modeling wave propagation in applications such as fluid dynamics traffic flow acoustics and elasticity The solution of the Riemann problem captures

essential information about these models and is the key ingredient in modern numerical methods for their solution This book covers the fundamental ideas related to classical Riemann solutions including their special structure and the types of waves that arise as well as the ideas behind fast approximate solvers for the Riemann problem The emphasis is on the general ideas but each chapter delves into a particular application Riemann Problems and Jupyter Solutions is available in electronic form as a collection of Jupyter notebooks that contain executable computer code and interactive figures and animations allowing readers to grasp how the concepts presented are affected by important parameters and to experiment by varying those parameters themselves The only interactive book focused entirely on the Riemann problem it develops each concept in the context of a specific physical application helping readers apply physical intuition in learning mathematical concepts Graduate students and researchers working in the analysis and or numerical solution of hyperbolic PDEs will find this book of interest This includes mathematicians as well as scientists and engineers working on wave propagation problems Educators interested in developing instructional materials using Jupyter notebooks will also find this book useful The book is appropriate for courses in Numerical Methods for Hyperbolic PDEs and Analysis of Hyperbolic PDEs and it can be a great supplement for courses in computational fluid dynamics acoustics and gas dynamics

**The Science of Aspects** Patricia M. Ball,2014-01-13

There is a science of the aspects of things as well as of their nature if this dictum of Ruskin is central to his aims in *Modern Painters* it points also to the remarkable affinity of creative effort to record and to interpret the natural world that links him with Coleridge at the beginning and with Hopkins in the latter half of the nineteenth century But the three writers stand in no simple relation of mere sequence and in this essay which continues the exploration of the Romantic and Victorian imagination begun in her previous book *The Central Self* Dr Ball follows the complex interrelationships clash and resolution of ideas by which a profound shift in nineteenth century creative vision was effected The notebooks and diaries of the three writers together with the literary work that grew out of or paralleled this material form the foundation for this illuminating essay but Dr Ball's enquiry is necessarily wide ranging and branches into such wider questions as the whole critical theory of the pathetic fallacy and the influence on Coleridge Ruskin and Hopkins of contemporary science and the visual arts
