*Toxic Matters* Monica Seger,2022-06-10 In Toxic Matters

Monica Seger considers two Italian environmental disasters an isolated factory explosion in Seveso just north of Milan in 1976 and the ongoing daily toxic emissions from the Ilva steelworks in the Apulian city of Taranto Both have exposed

residents to high concentrations of the persistent organic pollutant known as dioxin Although different in terms of geography and temporality Seveso and Taranto are deeply united by this nearly imperceptible substance and by the representational complexities it poses They are also united by creative narrative expressions in literary cinematic and other forms that push back against dominant contexts and representations perpetuated by state and industrial actors Seger traces a dialogue between Seveso and Taranto exploring an interplay between bodies soil industrial emissions and the wealth of dynamic particulate matter that passes in between At the same time she emphasizes the crucial function of narrative expression for making sense of this modern day reality and for shifting existing power dynamics as exposed communities exercise their voices While Toxic Matters is grounded in Italian cases and texts it looks outward to the pressing questions of toxicity embodiment and storytelling faced by communities worldwide
