The SimCalc Vision and Contributions Stephen J. Hegedus,Jeremy Roschelle,2012-12-16 This volume provides essential

guidance for transforming mathematics learning in schools through the use of innovative technology pedagogy and curriculum. It presents clear rigorous evidence of the impact technology can have in improving students learning of important yet complex mathematical concepts and goes beyond a focus on technology alone to clearly explain how teacher professional development, pedagogy, curriculum, and student participation and identity each play an essential role in transforming mathematics classrooms with technology. Further evidence of effectiveness is complemented by insightful case studies of how key factors lead to enhancing learning, including the contributions of design research, classroom discourse, and meaningful assessment. The volume organizes over 15 years of sustained research by multiple investigators in different states and countries who together developed an approach called SimCalc that radically transforms how Algebra and Calculus are taught. The SimCalc program engages students around simulated motions such as races on a soccer field and builds understanding using visual representations such as graphs and familiar representations such as stories to help students to develop meaning for more abstract mathematical symbols. Further, the SimCalc program leverages classroom wireless networks to increase participation by all students in doing, talking about, and reflecting on mathematics. Unlike many technology programs, SimCalc research shows the benefits of balanced attention to curriculum, pedagogy, teacher professional development, assessment, and technology and has proven effectiveness results at the scale of hundreds of schools and classrooms. Combining the findings of multiple investigators in one accessible volume reveals the depth and breadth of the research program and engages readers interested in:

- Engaging students in deeply learning the important concepts in mathematics
- Designing innovative curriculum software and professional development
- Effective uses of technology to improve mathematics education
- Creating integrated systems of teaching that transform mathematics classrooms
- Scaling up new pedagogies to hundreds of schools and classrooms
- Conducting research that really matters for the future of mathematics learning

El-Hi Textbooks & Serials in Print, 2003, 2003 *Math Instruction for Students with Learning Problems* Susan Perry Gurganus, 2017-02-24

Math Instruction for Students with Learning Problems Second Edition provides a research-based approach to mathematics instruction designed to build confidence and competence in pre and in-service PreK-12 teachers. This core textbook addresses teacher and student attitudes toward mathematics as well as language issues, specific mathematics disabilities, prior experiences, and cognitive and metacognitive factors. The material is rich with opportunities for class activities and field extensions, and the second edition has been fully updated to reference both NCTM and CCSSM standards throughout the text and includes an entirely new chapter on measurement and data analysis.
