The Yellow River The Problem Of Water In Modern China:

The Yellow River David A. Pietz, 2015-01-05 Flowing through the heart of the North China Plain home to 200 million people the Yellow River sustains one of China's core regions Yet this vital water supply has become highly vulnerable in recent decades with potentially serious repercussions for China's economic social and political stability The Yellow River is an investigative expedition to the source of China's contemporary water crisis mapping the confluence of forces that have shaped the predicament that the world's most populous nation now faces in managing its water reserves Chinese governments have long struggled to maintain ecological stability along the Yellow River undertaking ambitious programs of canal and dike construction to mitigate the effects of recurrent droughts and floods But particularly during the Maoist years the North China Plain was radically re-engineered to utilize every drop of water for irrigation and hydroelectric generation As David A Pietz shows Maoist water management from 1949 to 1976 cast a long shadow over the reform period beginning in 1978 Rapid urban growth industrial expansion and agricultural intensification over the past three decades of China's economic boom have been realized on a water resource base that was acutely compromised with effects that have been more difficult and costly to overcome with each passing decade Chronicling this complex legacy The Yellow River provides important insight into how water challenges will affect China's course as a twenty first century global power **China's**

Water Pollution Problems Claudio O. Delang, 2016-03-31 Water pollution is one of the most serious problems plaguing China today with millions of citizens drinking water unfit for consumption These abysmal conditions have fuelled increasing social discontent as people become more concerned by the need to address the pressing issues of water pollution scarcity and waste management This book describes how and why China has ended up in such a dire situation what the government is doing to address the problem and the difficulties encountered in attempting to reduce pollution The analysis is based on both gray literature newspaper articles NGO reports Chinese government information and on academic studies The gray literature gives a voice to those who suffer from the pollution their advocates and government officers and allows the reader to better grasp the conditions on the ground and the impact of the air pollution among the people in different areas in China The academic literature adds a theoretical perspective and brings these different case studies into a broader context This book will be of great interest to students of environmental pollution and contemporary Chinese studies looking for an introduction to the topic as well as researchers looking for an analysis of China's environmental problems *When the*

Yellow River Floods Hui-Lin Hsu, 2024-01-09 *When the Yellow River Floods* explores the relationship between environmental degradation hydraulic engineering and nation building in the context of Liu E's *The Travels of Lao Can* This book contributes to the field by providing a unique perspective on modern Chinese literary history that goes beyond conventional narratives that focus solely on political and cultural factors The main areas covered include the role of water management in literary nation building and the connections between the novel's various themes such as river engineering medical and political

discourses national sentiment and landscape description The book is targeted toward scholars and students of Chinese literature history and environmental studies as well as those interested in the intersections between literature nation building and environmental challenges By offering a comprehensive and material based analysis of The Travels of Lao Can this book broadens the understanding of nation building in early twentieth century China highlighting the impact of environmental crises and hydraulics on the formation of national literature and consciousness The book provides a new perspective on the environmental roots of modern Chinese literature making it an essential read for those seeking to understand the complex interplay between literature the environment and national identity in China **Water**

Management in the Yellow River Basin of China Charles Greer, 2014-07-03 Throughout history the Yellow River or Huang Ho has repeatedly broken through its levees to rampage over the densely populated North China Plain In spite of its importance as the major river of China little has been written on the Yellow River and its management Charles Greer fills this gap with his comprehensive and thoroughly researched book This work deals with the technological problems faced by the Chinese in taming the destructive river and also focuses on cultural attitudes that have governed the Chinese response to nature For example water control was not highly regarded by the Taoists who preferred to let nature take its course but the Buddhists sought to harness the river against devastating floods and also to benefit their crops Greer traces water use and management in the Yellow River Basin through Chinese history and discusses early Western interest in the flood problem and Soviet assistance in Yellow River development He analyzes traditional methods of control as well as newer strategies and their implications The author of this book is one of a small number of social scientists able to master the original Chinese language historical materials necessary to this undertaking He has also examined Chinese water management methods first hand as part of a delegation of water management specialists in 1976 In addition to geographers and conservationists China scholars will find this book valuable because of the axial role the control of the Yellow River plays in the fundamental economic health of the People s Republic of China Water management engineers will find much useful comparative material

Rivers of the Asian Highlands Ruth Gamble, Gillian G. Tan, Hongzhang Xu, Sara Beavis, Petra Maurer, Jamie Pittock, John Powers, Robert J. Wasson, 2024-10-17 Rivers of the Asian Highlands introduces readers to the intersecting headwaters of Asia s eight largest rivers focusing on the upper reaches of two river systems the Brahmaputra s highland tributaries in the eastern Himalayan Mountains and the Dri Chu upper Yangzi which descends from the Tibetan Plateau s east through the Hengduan Mountains This book guides its readers through these two rivers physical environmental cultural social and political histories before providing a multifaceted assessment of their present It uses general and detailed insights from multiple disciplines including anthropology conservation geography geomorphology climate science ecology history hydrology and religious studies The rivers stories explain how the catchments hazards earthquakes landslides floods droughts and erosion interact with their energetic hydrological ecological cultural and social abundance This book s multiple

cultural and disciplinary perspectives on the rivers will interest anyone who wants to understand the rivers of this critically important region as the environment faces climate change and other ecological crises Water Management in the Yellow River Basin, 2004 **Cutting the Mass Line** Andrea E. Pia, 2024-07-02 This book is aimed at rethinking social scientific approaches to collective action by exploring China's ongoing water crisis from the vantage point of Huize County a water stressed ecologically damaged multi ethnic area of rural Yunnan Province Water Jeremy J. Schmidt, 2019-04-01 An intellectual history of America's water management philosophy Humans take more than their geological share of water but they do not benefit from it equally This imbalance has created an era of intense water scarcity that affects the security of individuals states and the global economy For many this brazen water grab and the social inequalities it produces reflect the lack of a coherent philosophy connecting people to the planet Challenging this view Jeremy Schmidt shows how water was made a resource that linked geology politics and culture to American institutions Understanding the global spread and evolution of this philosophy is now key to addressing inequalities that exist on a geological scale Water Abundance Scarcity and Security in the Age of Humanity details the remarkable intellectual history of America's water management philosophy It shows how this philosophy shaped early twentieth century conservation in the United States influenced American international development programs and ultimately shaped programs of global governance that today connect water resources to the Earth system Schmidt demonstrates how the ways we think about water reflect specific public and societal values and illuminates the process by which the American approach to water management came to dominate the global conversation about water Debates over how human impacts on the planet are connected to a new geological epoch the Anthropocene tend to focus on either the social causes of environmental crises or scientific assessments of the Earth system Schmidt shows how when it comes to water the two are one and the same The very way we think about managing water resources validates putting ever more water to use for some human purposes at the expense of others Systems Analysis Approach for Complex Global Challenges Priscilla Mensah, David Katerere, Sepo Hachigonta, Andreas Roodt, 2018-04-09 This book which contains a collection of review articles as well as focus on evidence based policy making will serve as a valuable resource not just for all postgraduate students conducting research using systems analysis thinking but also for policy makers To our knowledge a book of this nature which also has a strong African focus is currently not available The book examines environmental and socio economic risks with the aim of providing an analytical foundation for the management and governance of natural resources disasters addressing climate change and easing the technological and ecological transitions to sustainability It provides scientific and strategic analysis to better understand the dynamics of future energy transitions their main driving forces enabling factors barriers as well as their consequences for the social economic and environmental dimensions of human wellbeing Science based policy advice is achieved through an integrated assessment and modeling of how to simultaneously address the major energy policy challenges in the areas of environment climate change and air

pollution energy poverty or access to affordable and clean energy for the poor energy security and reliability It also aims to improve our understanding of ecosystems and their management in today s changing world in particular the current state of ecosystems and their ecological thresholds and buffering capacities It provides support for policy makers in developing rational realistic and science based regional national and global strategies for the production of fuel food and fibre that sustain ecosystem services and safeguard food security Finally it addresses the human development dimension of global change based on comprehensive studies on the changing size and composition of human populations around the world by analyzing both their impacts and the differential vulnerabilities by age gender and level of education **Handbook On**

China is one of the world's largest industrial polluters and balancing the environmental concerns of citizens, the demands of industry and the interests of the nation is a complex challenge. *Blue Skies over Wuhan* uses Hubei Province, particularly its sprawling industrial capital Wuhan City, as a case study of growing environmental awareness in China in the 1970s and 80s. Yun Liu painstakingly sifts through a wealth of incident records to explore the evolution of environmental protection policy. Reports document repeated sectoral conflicts in this early system of crisis management when measures to contain industrial emissions largely failed because of inadequate policy implementation. Nonetheless, the attention that *Blue Skies over Wuhan* gives to newly uncovered evidence reveals a symbiotic relationship between communities and state actors that shaped the trajectory of environmental governance from an agenda dominated by economic growth priorities to a more mature state-led approach.

Environmental Sustainability from the Himalayas to the Oceans Shikui Dong, Jayanta Bandyopadhyay, Sanjay Chaturvedi, 2017-01-23 The book is written in the backdrop of the environmental impacts of and future requirements from the natural environment for rapid economic growth that has characterized recent economic history of China and India, especially over the past few decades. The environmental impacts of such rapid economic changes have been more frequently than otherwise degrading in character. Environmental impacts of economic activities create degraded natural ecosystems by overutilization of nature's provisioning ecosystem services from Himalaya to the Ocean as well by the use of the natural environment as a sink for dumping of unmarketable products or unused inputs of economic activities. Such processes affect a wide range of ecosystem processes on which the natural environment, including human population, depends. Critical perspectives cast by various chapters in this book draw attention to the various ways in which space and power interact to produce diverse geographies of sustainability in a globalizing world. They also address the questions such as who decides what kind of a spatial arrangement of political power is needed for sustaining the environment. Who stands to gain or lose what when where and why from certain geographical areas being demarcated as ecologically unique, fragile, and vulnerable environments whose needs and values are being catered to by a given ecosystem service? What is the scope for critical inquiry into the ways in which the environment is imagined, represented, and resisted in both geopolitical struggles and everyday life? The book provides insights to both academics from diverse disciplines and policy makers, civil society actors interested in mutual exchange of knowledge between China and India.

Water Lords Lei Zhang, 2025-02-27 *Water Lords* presents the untold story of drinking water and its carriers in Beijing from the imperial Qing to the Republican period. It adds an ecological perspective to existing studies by foregrounding water as a distinctive force that shaped urban life in the realms of technology, society, and politics. With this book, Lei Zhang makes a new and meaningful contribution to the field of Chinese environmental history by attending to water as a daily necessity and examining the previously neglected arrangements that provided urban denizens with predictable access to this critical resource.

Yangzi Waters: Transforming the Water Regime of the Jiangnan Plain in Late Imperial China Yan Gao, 2022-01-17 This book centers

on the changes of polders and investigates the complex hydro social relationships of the Jiangnan Plain in late imperial China Once a hydraulic frontier where local communities managed the polders the Jiangnan Plain became a state led hydro electric powerhouse by the mid twentieth century Through meticulous historical analysis this book shows how water politics cultural practice and ecology interplayed and transformed the landscape and waterscape of the plain from a long term perspective By touching on topics such as religious beliefs ethnic tension and militarization the author reveals a plain in between nature and culture that has never been fully examined before *Sustainability of Engineered Rivers In Arid Lands* Jurgen
